

## CONTENTS

1. Current Topics in Liquid-Crystalline Polymers	1
<b>SYNTHESIS OF MAIN-CHAIN LIQUID-CRYSTALLINE POLYMERS</b>	
2. Polyesters of 4,4'-Biphenyldicarboxylic Acid and Aliphatic Glycols for High-Performance Plastics	16
3. Thermotropic Aromatic Copolyesters Having Ordered Comonomer Sequences: Syntheses and Properties	33
4. All-Aromatic Liquid-Crystalline Polyester of Phenhydroquinone with Ether and Ketone Linkages	46
5. Thermotropic Main-Chain Polyethers Based on Bis (4-hydroxyphenoxy)-p-xylene	62
6. Synthesis and Chemical Modification of Chiral Liquid-Crystalline Poly (ester B-sulfide)s	79
7. Liquid-Crystalline Character of Novel Main-Chain Oligophosphates Bearing Lipophilic and/or Mesogenic	93
8. Thermotropic Poly (ester-co-carbonate)	102
9. Structure and Thermal Properties of Liquid-Crystalline Poly (ester-co-carbonate)	115
10. Synthesis and Microstructure of Aromatic Copolyesters	129
<b>SYNTHESIS OF SIDE-CHAIN LIQUID-CRYSTALLINE POLYMERS</b>	
11. Synthesis, Characterization, and Photochemistry of a Cinnamate-Containing Liquid-Crystalline Side-Chain Polymer	144
12. All-Hydrocarbon Liquid-Crystalline Side-Chain AB Block Copolymers: Synthesis and Morphology	158
13. Amorphous – Liquid-Crystalline Side-Chain AB Block Copolymers: Synthesis and Morphology	174
14. Side-Chain Liquid-Crystalline Polyphosphazenes	185
<b>PHYSICS OF LIQUID-CRYSTALLINE POLYMERS: NETWORKS</b>	
15. Rigid Rod Molecules as Liquid-Crystalline Thermosets	198
16. Synthesis, Structure, and Properties of Functionalized Liquid-Crystalline Polymers	207
<b>PHYSICS OF LIQUID-CRYSTALLINE POLYMERS: TEXTURE AND STRUCTURE</b>	
17. Chemical Heterogeneity in Liquid-Crystalline Polyesters	220
18. Light Microscopy of Liquid-Crystalline Polymers	241
19. Solid-State Structures of a Homologous Series of Mesogenic Aromatic – Aliphatic Azomethine Ether Polymers	256
20. Copolymerlike Structures of Nematic Nitroimine Dimers	269
21. Simulation and Evaluation of Polymorphism in the Solid State of a Rigid Rod Aramid	279

## **PHYSICS OF LIQUID-CRYSTALLINE POLYMERS: TRANSITIONS AND PROPERTIES**

22. Calorimetric Investigation of the Glass Transition in Main-Chain Nematic Polymers: Molecular Mass Dependence of the Heat Capacity Increment at the Glass Transition	294
23. Liquid-Crystalline Polymers: A Unifying Thermodynamics-Based Scheme	308
24. Solubilities, Processabilities, and Head-to-Tail Polymerization of Liquid-Crystalline Polymers: Including First Super-Strong Polymers	335
25. Molecular Motion in the Homopolymer of 4-Hydroxybenzoic Acid	359

## **APPLICATIONS OF LIQUID-CRYSTALLINE POLYMERS: RHEOLOGY AND PROCESSING BEHAVIOR**

26. Effect of Shear History on the Rheological Behavior of Lyotropic Liquid Crystals	370
27. Shrinkage in Parts Molded from Thermotropic Liquid-Crystalline Polymers: Dependence upon Part Geometry and filler Content	381
28. Blending of Polymer Liquid Crystals with Engineering Polymers: The Importance of Phase Diagrams	402
29. Novel Composites from Blends of Amorphous and Semi-crystalline Engineering Thermoplastics with Liquid-Crystalline Polymers	416
30. Investigations into the Structure of Liquid-Crystalline Polymer – Liquid-Crystalline Polymer Blends	439
31. Kinetics of Phase Segregation in Thermotropic Liquid-Crystalline Copolyester and Polyether Imide Blends	458
32. Polymer-Dispersed Liquid Crystals	475
