

CONTENTS

PART I COMPATIBILIZATION AND MISCIBILITY

| | |
|---|-----|
| 1. Compatibilization of Polymer Blends | 1 |
| 2. Compounding and Compatibilization of High-Performance Polymer Alloys and Blends | 23 |
| 3. Miscibility and Interfacial Behavior in Polymer-Polymer Mixtures | 53 |
| 4. Miscibility and Relaxation Processes in Blends | 81 |
| 5. Thermoplastic Rubber via Dynamic Vulcanization | 125 |
| 6. Thermosetting Polymer Blends: Miscibility, Crystallization, and Related Properties | 155 |
| 7. Computer Simulation of Spinodal Decomposition in Polymer Mixtures | 189 |
| 8. Interactions and Phase Behavior of Polyester Blends | 209 |
| 9. Miscibility of Nylon 66/Santoprene Blends | 235 |

PART II CHARACTERIZATION

| | |
|--|-----|
| 10. High-Performance Polymer Blends and Alloys: Structure and Properties | 263 |
| 11. “Natural: Polymer Alloys: PC/ABS Systems | 289 |
| 12. Properties of Thermotropic Liquid Crystalline Polymer Blends | 331 |
| 13. Polymer Liquid Crystals in High-Performance Blends | 365 |
| 14. Structure-Property Relationships in Poly (aryl Ether Ketone) Blends | 381 |
| 15. Applications of X-Ray Photoelectron Spectroscopy and Secondary Ion Mass Spectrometry in Characterization of Polymer Blends | 415 |
| 16. Emulsion Models in Polymer Blend Rheology | 451 |

PART III MORPHOLOGY

| | |
|---|-----|
| 17. Microstructure of Multiphase Blends of Thermoplastics | 475 |
| 18. Study on Morphology and Toughening Mechanisms in Polymer Blends by Microscopic Techniques | 505 |
| 19. Deformation Mechanisms in Toughened PMMA | 549 |
| 20. Impact Toughening Mechanisms in Glassy Polymers | 575 |

PART IV RECENT DEVELOPMENTS

| | |
|---|-----|
| 21. New Strategies for-the Tailoring of High-Performance Multiphase Polymer-Based Materials | 595 |
| 22. Developments in Reactive Blending | 621 |
| 23. Developments in Poly (vinyl chloride)/Epoxidized Natural Rubber Blends | 663 |
| 24. Development of Oil Palm-Based Lignocellulose Polymer Blends | 719 |
| Index | 739 |
