

CONTENTS

1	Introduction	1
1.1	The Age of Plastics	2
1.2	Introduction to Polymer History	2
1.3	Polymers and Nonpolymers	12
1.4	The Molecular State	14
1.5	Monomer: The Building Block of a Polymer	24
1.6	Polymerization: The Building of a large Molecule	27
1.7	Molecular Orientation or Stereoisomerism	34
1.8	Copolymers and Terpolymers	35
1.9	Polymer Blends and Alloys	38
1.10	Molecular Forces and Chemical Bonding	41
1.11	The High Polymer: Redefinition	44
1.12	Thermoplastic and Thermosetting Polymers: A Summery	47
2	The Polymer Solid State	79
2.1	Introduction	80
2.2	Polymer Molecular Weight	80
2.3	Methods for Measuring Molecular Weight	88
2.4	Molecular Order of Thermoplastics	96
2.5	Polymeric Transitions	133
2.6	Transport Properties of Polymers	149
2.7	The Nature of Polymer Additives, Fillers and Reinforcements	157
3	Mechanical Properties of Polymers	189
3.1	Introduction to Classical Materials	190
3.2	Stress	191
3.3	Strain	193
3.4	Constitutive Equation	195
3.5	Response of Classical Materials to Cyclic Deformation	204
3.6	Deformational Behavior of Polymer	208
3.7	Tome-Temperature Superposition	250
3.8	Polymeric Yield and Ductility	257
3.9	The Nature of Fracture	266

4	Polymer Fluid and Chemical Properties	291
4.1	Introduction	292
4.2	The Nature of Flow	293
4.3	Steady Flow Through a Capillary Tube	307
4.4	Time Dependency and Anomalous Elastic Liquid Effects	314
4.5	External Effects n Viscosity	322
4.6	Polymer Melt Thermodynamics	330
4.7	Polymer Solution Thermodynamics	350
4.8	Diffusion of Small Molecules into Polymers	364
4.9	Thermodynamically and Kinetically Good Solvents	366
4.10	Water in Polymers	376
4.11	The Role of Plasticizers	379
4.12	Chemical Resistance	381
5	Processing	395
5.1	Introduction	396
5.2	Categories of Plastics Processing Techniques	398
5.3	Selected Plastics Processing Techniques	404
5.4	Polymer Material Properties in Computer-Aided Engineering	487
6	Testing For Design	501
6.1	Introduction	502
6.2	Fluid Material Properties: Rheological Measurements	507
6.3	Solid Material Properties-Moderate Time Measurements	527
6.4	Solid Mechanical Properties: Short-Time Duration Tests	576
6.5	Solid Mechanical Properties: Long-Term Tests	618
6.6	Friction and Wear	666
6.7	Environmental Testing	679
6.8	Electrical Properties of Polymers	699
6.9	Part Design Constraints: ASTM D955	716
6.10	Optical Characteristics, Including Color	723
	Homework Conversion Factors	739
	Appendices	761
	A Sources of Polymeric Materials: General Statistics	761
	B Polymeric Fillers	771
	C Physical Properties of Polymers	789
	D Creep Properties of Polymers	811
	E Thermodynamic Tables for Several Polymers	833
	Credits	857
	Indices	865
