

## CONTENTS

1	Introduction	1
<b>PART 1</b>	<b>POLYMER FUNDAMENTALS</b>	<b>5</b>
2	Types of Polymers	7
3	Bonding in Polymers	25
4	Stereoisomerism	30
5	Crystallinity	37
6	Characterization of Molecular Weight	47
7	Polymer Solubility and Solutions	74
8	Transitions in Polymers	88
<b>PART 2</b>	<b>POLYMER SYNTHESIS</b>	<b>101</b>
9	Polycondensation Reactions	103
10	Free-radical Addition Polymerization	115
11	Non-radical Addition Polymerization	152
12	Copolymerization	165
13	Polymerization	175
<b>PART 3</b>	<b>POLYMER PROPERTIES</b>	<b>187</b>
14	Rubber Elasticity	189
15	Purely Viscous Flow	199
16	Viscometry and Tube Flow	213
17	Introduction to Continuum Mechanics	231
18	Linear Viscoelasticity	236
<b>PART 4</b>	<b>POLYMER TECHNOLOGY</b>	<b>279</b>
19	Processing	281
20	Plastics	302
21	Rubbers	314
22	Synthetic Fibers	319
23	Surface Finishes	321
24	Adhesives	327
	Selected Readings	332
	Index	335
