

CONTENTS

POLYMERS AND INTERMEDIATES

- | | | |
|----|-----------------------------------------------------------------------------------------------------|----|
| 1. | Structural Design of Water-Soluble Copolymers | 2 |
| 2. | Synthetic Methods for Water-Soluble Monomers and Polymers: Nonpolyelectrolytes and Polyelectrolytes | 25 |
| 3. | Water-Soluble Polymer Synthesis: Theory and Practice | 57 |
| 4. | Chemical Modifications of Natural Polymers and Their Technological Relevance | 74 |

POLYMER SYNTHESIS AND MODIFICATION

- | | | |
|-----|---------------------------------------------------------------------------------------------------------------------------------|-----|
| 5. | Mechanism and Kinetics of the Persulfate-Initiated Polymerization of Acrylamide | 82 |
| 6. | Persulfate-Initiated Polymerization of Acrylamide at High Monomer Concentration | 105 |
| 7. | Copolymers of Acrylamide and a Novel Sulfobetaine Amphoteric Monomer | 119 |
| 8. | Synthesis and Solution Characterization of Pyrene-Labeled Polyacrylamides | 130 |
| 9. | Comblike Cyclopolymers of Alkyldiallylamines and Alkyldiallylmethylammonium Chlorides | 151 |
| 10. | New Fluorocarbon-Containing Hydrophobically Associating Polyacrylamide Copolymer | 159 |
| 11. | Hydrophobically Associating Ionic Copolymers of Methylallyl-(1,1-dihydropentadecafluoro- <i>o</i> -ctoxyethyl)ammonium Chloride | 175 |
| 12. | Peptide Graft Copolymers from Soluble Aminodeoxycellulose Acetate | 189 |

PHYSICOCHEMICAL ASPECTS OF AQUEOUS SOLUTIONS

- | | | |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 13. | Sodium-Ion Interactions with Polyions in Aqueous Salt-Free Solutions by Diffusion | 202 |
| 14. | Aqueous-Solution Behavior of Hydrophobically Modified Poly(acrylic Acid) | 218 |
| 15. | Role of Labile Cross-Links in the Behavior of Water-Soluble Polymers: Hydrophobically associating Copolymers | 232 |
| 16. | Probes of the Lower Critical Solution Temperature of Poly(N-isopropylacrylamide) | 249 |
| 17. | Complexation Between Poly(N-isopropylacrylamide) and Sodium <i>n</i> -Dodecyl Sulfate: Comparison of Free and Covalently Bound Fluorescent Probes | 261 |
| 18. | Determination of Molecular-Weight Distribution of Water-Soluble Macromolecules by Dynamic Light Scattering | 276 |
| 19. | Photophysical and Rheological Studies of the Aqueous-Solution Properties of Naphthalene-Pendent Acrylic Copolymers | 291 |
| 20. | Hydrophobic Effects on Complexation and Aggregation in Water-Soluble Polymers: Fluorescence, pH, and Dynamic Light-Scattering Measurements | 303 |
| 21. | Roles of Molecular Structure and Solvation on Drag Reduction in Aqueous Solutions | 23 |
| 22. | Rheological Properties of Hydrophobically Modified Acrylamide-Based Polyelectrolytes | 338 |

BIOMEDICAL AND INDUSTRIAL APPLICATIONS

23. Bioadhesive Drug Delivery	350
24. Heparin, Heparinoids, Synthetic Polyanions, and Anionic Dyes: Opportunities and New Developments	367
25. Amine-Functionalized, Water-Soluble Polyamides as Drug Carriers	394
26. Hydrosoluble Polymeric Drug Carriers Derived From Citric Acid and L-Lysine	405
27. New Polyethylene Glycols for Biomedical Applications	418
28. Biomedical Applications of High-Purity Chitosan: Physical, Chemical, and Bioactive Properties	430
29. Viscosity Behavior and Oil Recovery Properties of Interacting Polymers	446

ADVANCES IN LESS CONVENTIONAL SYSTEMS

30. Hydrophilic – Hydrophobic Domain Polymer Systems	468
31. Enzyme-Degradable Hydrogels: Properties Associated with Albumin-Cross-Linking Polyvinylpyrrolidone Hydrogels	484
32. Comparison of Solution and Solid-State Structures of Sodium Hyaluronan by ¹³ C NMR Spectroscopy	493
33. Thermoreversible Gels	502
