

CONTENTS

	Page
Chapter 1	
Demand, Supply and Distribution Patterns	
1. Overall Patterns of Supply and Demand	1
2. Demands for Gold for Fabrication Purposes	9
3. Demands for Hoarding and Investment	21
4. Distribution patterns	24
References	24
Chapter 2	
Gold for Investment and Hoarding	
1. Gold coins	25
2. Gold Bars and Gold in Other Forms	28
References	29
Chapter 3	
Carat Golds	
1. Introduction	30
2. The Compositions of Commercially Available Carat Golds	30
3. Yellow, Green and Red Carat Golds: The Au-Ag-Cu System	33
4. White Carat Golds	41
5. Violet Gold	49
6. Special Aspects of the use of Carat Golds	49
7. Carat Gold Solders	80
References	85
Chapter 4	
Dental Golds	
1. Introduction	95
2. Gold Foil, Mat Gold and Gold Powder	95
3. Casting Alloys Based upon the Au-Ag-Cu System	96
4. Casting Alloys for Coating with Enamel Veneers	99
5. Wrought Gold Alloys for Plates and Wires	104
6. Dental Gold Solders	104
References	106
Chapter 5	
Gold and Gold Alloys in Instrumental Applications	
1. Introduction	111
2. Gold Alloy Resistors for Standard Resistances and Potentiometer Wire	113
3. Gold Films in Resistance Thermometry	117
4. Gold Alloys for Low Temperature Resistances Thermometry	118
5. Gold Alloys for Thermocouples	118
6. Gold and Gold alloys in Conductor Applications	120
7. Gold and Gold Alloys in Miscellaneous Instruments	125
References	130
Chapter 6	
Gold and Gold Alloys in Engineering Applications	
1. Industrial Gold Solders and Brazes	136
2. High Strength, Corrosion Resistant Gold-Rhodium-Platinum Alloys for Spinnerets and Other Applications	147

3.	Applications Based upon the Optical Properties of Gold and its Alloys	150
4.	Miscellaneous Engineering Applications	166
	References	170

Chapter 7

The Bonding of Gold and Gold Alloys to One Another, to Other Metals and To Glass and Ceramics

1.	Introduction	178
2.	Solid Phase Bonding of Gold to Gold and to Other Metals and Alloys	178
3.	Liquid Phase Bonding of Gold to Gold and to Other Metals and Alloys	184
4.	Bonding of Gold to Glass	188
5.	Bonding of Gold to Ceramic Materials	191
	References	192

Chapter 8

Electroplated Golds

1.	Introduction	196
2.	Chemical Considerations: Gold Complex and Their Stabilities	197
3.	Thermodynamic Aspects of the Deposition of Gold from Gold Complexes	201
4.	Electrochemical Aspects of the Plating of Gold and Gold Alloys	204
5.	Kinetics and Mechanisms of Gold Plating	213
6.	Electrocrystallisation Processes	214
7.	Electroplating of Pure Gold from Cyanide Baths	222
8.	Electroplating of Gold Alloys for Decorative Purposes From Cyanide Baths	230
9.	Electroplating of Gold Alloys for Industrial Purposes from Cyanide Baths	236
10.	Electroplating of Gold and Gold Alloys From Other Types of Baths	248
11.	Electroforming of Gold and Gold Alloys	254
	References	255

Chapter 9

Gold and Gold Alloy Coating of Other Types

1.	Liquid Golds	271
2.	Mechanically Clad Golds	273
3.	Gold Coatings Formed by Thick Film Processes	276
4.	Vacuum Coated Gold and Gold Alloys: Thin Film Processes	279
5.	Electroless Gold Coatings	281
6.	Mercury Gilded Gold Coatings	286
	References	286

Chapter 10

Gold and Gold Alloys in Miscellaneous Forms and Uses

1.	Gold and Gold Alloy Wire	292
2.	Gold Leaf	294
3.	Colloidal Golds	295
4.	Gold in Glass	297
5.	Gold Powders	298
6.	Gold Composites	300
7.	Gold Skeletal Foams and "Expanded" Golds	302
8.	Gold Alloys With Shape Memory	302
9.	Gold in Photography	304
10.	Radioactive Gold	306
11.	The Use of Gold in Medicine	309
12.	Gold as a Catalyst	310
	References	314
