

## CONTENTS

|  | Page |
|--|------|
| 1. The Background                                    | 1    |
| 2. Properties of Silver                              | 9    |
| 3. Binary Silver Alloys                              | 37   |
| 4. Ternary and Engineering Alloys Containing Silver  | 123  |
| 5. Technology of Silver                              | 167  |
| 6. Low-Temperature Bonding of Silver                 | 183  |
| 7. High-temperature Bonding of Silver                | 199  |
| 8. The Use of Silver in Bearings                     | 221  |
| 9. Coatings  | 237  |
| 10. Electroplated Silver Coatings                    | 243  |
| 11. Chemical and Vaporized Coatings                  | 285  |
| 12. Silver in Stationary Electrical Contacts         | 297  |
| 13. Silver in Moving Electrical Contacts             | 313  |
| 14. Silver as a Catalyst                             | 343  |
| 15. Corrosion Resistance of Silver and silver Alloys | 357  |
| 16. The Oligodynamic Effect of Silver                | 401  |
| 17. Silver as a Fungicide                            | 431  |
| 18. Miscellaneous                                    | 451  |
| 19. Statistics of Industrial Consumption             | 463  |
| 20. Summary and Conclusions                          | 471  |
| Appendix I Bibliography                              | 475  |
| Appendix II Patent Index                             | 607  |
| Index  | 625  |
