

## CONTENTS

	Page
1. Electrodeposition of Mixed Valence Molybdenum Oxyhydroxide Films and Their Characterization	1
2. Formation of Carbonaceous-Coatings on Aluminium Using Poly(Vinyl Alcohol)	3
3. Effect of Fe/Si Ratio in Intermetallic Compound Particles on Pitting Attacks of Aluminum 1100	6
4. Selective Removal of FeAl <sub>3</sub> Intermetallic compound Particles on Aluminum by Electrochemical Treatment in a Nitric Acid	9
5. Solute-solute and Solute-solvent Interactions in Transition Metal Alloys: Pt-Ti System	11
6. High Elevated-Temperature Strength of Al-based Nanoquasicrystalline Alloys	14
7. Production and Mechanical Properties of Al-M(M=Cr, V, Ti) Base Alloys Containing Aperiodic Nano-Particles	15
8. Importance of Microstructural Stability to Creep Strength of Fully Lamellar TiAl Alloys	16
9. Study of Primary Creep in Ti-6-22-22S Alloys	17
10. Slurry Erosion Behaviour of Some Aluminium Cast Alloys	18
11. Temperature Programmed Photoelectron Emission Technique for Metal Surface Analysis	20
12. Observation of Real Metal Surfaces by Temperature Programmed Photoelectron Emission Technique	21
13. The Fatigue Mechanism of Dual Phase TiAl Coated with TiAlN Film by PVD Process at an Elevated Temperature	24
14. Atmospheric Galvanic Corrosion Behavior of AZ92D Coupled to Other Metals	26
15. High Temperature Embrittlement Caused by Trace Element and Its Suppression by Additional Elements in an Al-5.5mol%Mg Alloy	29
16. Effect of Trace Impurities on Intergranular Fracture of Aluminum Alloys	30
17. Analysis of the Temperature Dependence of Tensile Elongation for a Mechanically Milled Al-1.1at%Mg-1.2at%Cu Alloy by a Dislocation Dynamics Approach	33
18. An Interpretation of the True Stress-True Strain Behavior for a Mechanically Milled, Superplastic Al-Mg-Cu Alloy from a Dislocation Dynamics Viewpoint	35
19. Photonic Crystal Using Anodic Porous Alumina	38
20. Change in Surface Free Energy of Silicon in Si/Al-Si Systems during Wetting Measurement by the Sessile Drop Method	39
21. Influence of Gravity on the Microstructure of Directionally Solidified Ag-Si Eutectic Alloy	40
22. A Novel Approach for the Study of the Migration of Cl-Ions in Anodic Alumina	42
23. Life Cycle Assessment of Beverage Cans	45
24. Solidification Crack Sensitivity of TIG Welded AZ31 Magnesium Alloy	47
25. Effects of Inclination Angle of Faying Surface on the Mechanical Properties of Friction Welded Joints of 5052 Aluminum Alloy	50
26. Solid State Reactions in Mechanically Alloyed Al-Y Alloy with Addition of Metal Oxides	53
27. Solid State Reaction in Mechanically Alloyed Al-Ca Alloy with Addition of Metal Oxides	55
28. Structures and Properties of Rapidly Solidified Al-6~8mass%Mn-1~3mass%Cr Alloys	58
29. Cube texture Formation in Pure aluminium as Influenced by Impurities and Rolling Temperatures	61
30. Restriction of Dynamic Recrystallization of Aluminium Containing Trace Iron and Silicon During compression Testing at Intermediate Zener-Hollomon Parameter Values	64
31. Dynamic Evolution of Fine Grained Structure and Superplasticity in an Unrecrystallized 7075 Aluminum Alloy	69
32. Dieless Shear Spinning of Truncated Conical Shells	72
33. Role of Shear Band in Texture Control of Al-Mg Alloys	74
34. Preparation of Functionally Graded materials by Pulse Current Pressure Sintering of Ball Milled Al-50at% Ti powder	76
35. Stored Energy and Recrystallization of 3004 and 5083 Aluminum Alloys Prepared by Two-directional Rolling at Cryogenic Temperature	77

36.	Fabrication of Composite Materials from Multilayered Al/Ti Foils by Pressure Welding at Room Temperature	78
37.	Effect of Microstructure refinement on High Strain Rate Superplasticity in a PM 2024Al-Fe-Ni Alloy	81
38.	Microstructure Refinement and High Strain Rate Superplasticity of Al-Zn-Mg-Cu P/M Alloy Extrusions	83
39.	High Resolution Energy-filtering Transmission Electron Microscopy for Equilibrium $\beta$ -phase in an Al-Mg-Si Alloy	85
40.	Crystal Structure of the $\beta$ "phase in an Al-1.0mass%Mg <sub>2</sub> Si-0.4mass%Si Alloy	86
41.	Observation of Precipitates in Al-Mg-Si-Cu Alloy by High Resolution Transmission Electron Microscopy	87
42.	Energy Filtering HRTEM Study of Equilibrium Mg-Si Alloys	88
43.	HRTEM Observation of the Precipitates in Two-step Aged Al-1.0mass% Mg <sub>2</sub> Si-0.4mass%Si Alloy	89
44.	Precipitation Sequence of Various Kinds of Metastable Phases in Al-1.0mass% Mg <sub>2</sub> Si-0.4mass%Si Alloy	91
45.	High Strain Rate Superplastic Forming into Rectangular Part of SiC Particle Reinforced 2124 Aluminum Alloy Composite Sheet	93
46.	Consolidating and Particle Dispersing Process in Compressive Torsion Forming of SiC/Aluminum Powder Mixture	94
47.	New Approaches to Smart Processing of Metal Matrix Composites	97
48.	Ultrasonic Cast Joining of Aluminum Matrix Composite by Molten Aluminum Alloy	98
49.	Adhesive Strength of Ni-P Electrodeposits on Substrates Pretreated Using an Electrolytic Jet with SiC Particle	100
50.	Synthesis of Titanium Silicide Matrix Composite Coatings by Reactive RF Plasma Spraying	101
51.	Preparation of In Situ Reinforced Composite Using Ultrasonic Vibration and Selective Incorporation of Reinforcements by Magnetic Field	103
52.	In-situ SEM Study on Effect of Inclusion Particles on Fracture Behavior in Al-Li system Alloy	105
53.	Stress Criterion of Delamination Cracking in A2091 Al-Li Alloy	107
54.	Fabrication Process of Metal matrix Composite with Nano-size SiC Particle Produced by Vortex Method	108
55.	Toughness and Microstructural Parameters in Thermomechanically Processed 2091 Al-Li Alloy	109
56.	Fatigue Properties and Microstructure of Al-Si-Cu system Casting Alloys	110
57.	Effect of Microstructure on Fatigue Crack Propagation Characteristic of Al-Si-Cu Die Casting Alloys	112
58.	Effect of Loading Velocity on Fracture Toughness of a SiCw/A6061 Composite at Elevated Temperatures	114
59.	Micromechanism of Fracture in Wrought Aluminum Alloy Containing Coarse Inclusion Particles	115
60.	Fatigue Characteristics of Biomedical Titanium Alloys	118
61.	Fatigue Crack Initiation and Fatigue Life Prediction of Ti-6Al-4V ELI	120
62.	Small Fatigue Crack Initiation and Propagation Characteristics of Ti-6Al-7Nb	121
63.	Effects of Microstructure and Simulated Body Environment on Fatigue Crack Growth Behavior of Implant material Ti-5Al-2.5Fe Alloy	123
64.	Corrosion Wear Fracture of New $\beta$ Type Biomedical Titanium Alloys	124
65.	Melting Method for Biomedical Ti-Ta Alloy with High Melting Point	126
66.	Relationship between Fatigue Life, Changing of Mechanical Properties and Dislocation Structure during Fatigue in Pure Titanium	128
67.	The Synthesis and Evaluation of Ti-Al-C Composite Materials by SHS P-HIP Method	130
68.	Metastable Phase in Al-Zn-Mg Ternary Based Alloys	131
69.	Modeling of Influences of Interfacial Reaction and Interfacial Strength on Static Fracture Behavior of Unidirectional SiC/ Titanium-aluminide Composites	133
70.	Effects of Meshing and Viscosity on Mold Filling Simulation	135
71.	Intermetallic Compound Al <sub>3</sub> Ti Surface Layer Formed by Laser Cladding on aluminum and Its Compatibility with Ceramics	137
72.	Combustion Synthesis of Intermetallic Compound Al <sub>3</sub> Ti and Its Simultaneous Joining with TiAl	139
73.	Welding Phenomena of Aluminum-Copper Alloy in Electron Beam Welding	141

74.	Effect of Gravity on Welding Phenomena	142
75.	Solute Diffusion of Ni in Icosahedral Al-Pd-Mn Quasicrystals	145
76.	Activation Volume for Anomalous Diffusion in $\beta$ -Titanium	148
77.	Diffusion of zinc in Commercial Al-Zn Alloys under High Pressure	150
78.	Neural Network Evaluation of 5056 Aluminum Friction Welded Joint Performance	152
79.	Surface Modification of Titanium by Nitrogen Ion Implantation	154
80.	Chemical Reactions Between Aluminum Dross and Various Aqueous Solutions	157
81.	Interfacial Reaction and Its Effect on Strength of Al <sub>18</sub> B <sub>4</sub> O <sub>35</sub> /Al Composites	159
82.	Interference Characteristics of Supersonic Jets Issuing from Dual Parallel Asymmetric Nozzles	162
83.	Study of Structure of Pseudo-Shock Waves in Asymmetric Under-Expanded Supersonic Jet	163
84.	Effects of Loading Mode and Specimen Orientation on Stress Corrosion Cracking Behavior Of High-Strength Wrought Al-Zn-Mg-Cu System Alloy	165
85.	Effect of Sc-Addition on the Coarsening Behavior of Al <sub>3</sub> Li Precipitates in Al-Li Alloys	167
86.	Wear Behavior of Al-Al <sub>3</sub> Ti Composite Manufactured by a Centrifugal Method	169
87.	Sulfidation-and Oxidation-Resistant Alloys Prepared by Sputter Deposition	171
88.	The Degradation of the Corrosion Resistance of Sputter-Deposited Chromium-Titanium Alloys by Nanoscale Heterogeneity	172
89.	Influence of Aluminum Surface Morphology on Electroluminescent Intensity	174
90.	Further Study on the Effects of Specimen Thickness and Grain Size on the Creep Behavior of Aluminum Alloy foils	177
91.	Embrittlement in an Age-Hardened 2091 Aluminum Alloy by Exposure at Elevated Temperature below the aging Temperatures	179
92.	Manufacturing of Al-Al <sub>3</sub> Fe Functionally Graded Material Using the Vacuum Centrifugal Method and measurements of Its Mechanical Properties	181
93.	Measurements of Particle Size Distributions in Functionally Graded Materials Fabricated By Centrifugal method	182
94.	Wear Resistance of Al-Al <sub>3</sub> Ni Functionally Graded Materials Fabricated by Centrifugal Method	183
95.	Development of Recyclable Functionally Graded Materials	184
96.	Three Dimensional Observation of Al <sub>3</sub> Ti Platelets in Al- Al <sub>3</sub> Ti FGMs Fabricated by Centrifugal Method	185
97.	Fabrication of Hybrid Al-( Al <sub>3</sub> Ti+ Al <sub>3</sub> Ni)FGMs by Centrifugal Method	187
98.	Thermodynamic Properties and Single-Electrode Peltier Heats of Li-Al Alloy in LiCl-KCl Eutectic Melt	188
99.	SIMS Analysis of Titanium Nitride Layer Prepared by Plasma Nitriding	190
100.	Finite-Element Analysis of the Formability of a Magnesium-Based Alloy AZ31 Sheet	193
101.	The Application of Some Criteria for Ductile Fracture to the Prediction of the Forming Limit of Sheet Metals	196
102.	Effect of Strain Rate on Deformation Behaviour of a Mg-8.5Li-Zn Alloy Sheet at Room Temperature	199
103.	Characteristics of CsF-AlF <sub>3</sub> System Non-corrosive Flux for Brazing of Aluminum	202
104.	The Effect of Si upon the Interfacial Reaction Characteristics in SiC/Al-Si System Composites during Multiple –remelting	204
105.	Formation of Ternary L <sub>2</sub> Intermetallic Compound and Phase Relation in the Al-Ti-Fe System	208
106.	Indistinct defect Images in Topographs of Nearly Perfect Aluminum Crystals Just Prior To Appearance of Dislocation Loops	210
107.	Diffusion of Zinc in Commercial Al-Zn Alloys under High Pressure	213
108.	Diffusion of Magnesium in Commercial Al-Mg Alloy under High Pressure	218
109.	Quaternary Diffusion in the $\alpha$ Solid Solutions of Al-Zn-Mg-Cu Alloys	222
110.	Deformation Behavior and Internal Stress of Icosahedral Al-Pd-Mn with Decagonal Phase Lamellae at Elevated Temperatures	228
111.	High Temperature Deformation Behavior of Ultra-high Purity Polycrystalline Silicon	229
112.	Processing by Equal-Channel Angular Pressing: Potential for Achieving Superplasticity	231
113.	An Examination of the Deformation Process in Equal-Channel Angular Pressing	233
114.	Factors Influencing the Development of Ultrafine Grained Materials Through Severe Plastic Deformation	235
115.	Thermal Stability of Ultrafine-Grained Aluminum in the Presence of Mg and Zr Additions	239
116.	An Evaluation of Superplasticity in Aluminum-Scandium Alloys Processed by Equal-Channel Angular Pressing	240

117.	Developing Superplastic Properties in an Aluminum alloy Through Severe Plastic Deformation	242
118.	Significance of Adiabatic Heating in Equal-Channel Angular Pressing	243
119.	Influence of Stacking Fault Energy on Microstructural Development in Equal-Channel Angular Pressing	245
120.	Microstructural Evolution in an Al-1.7at%Cu Alloy Deformed by Equal-Channel Angular Pressing	
121.	The Evolution of Microstructure and Grain Boundary Character during ECA Pressing of Pure Aluminum	247
122.	History of Aluminum and Its Prospect	249
123.	Trend of Light Weight Car-body for high-Speed Train and Aluminum Materials	249
124.	Aluminum Applications for Automobile Parts	249
125.	Aluminum Architecture	250
126.	Environmental Problems and Aluminum Materials	250
127.	History of Aluminum and Its Prospect (II) Physical metallurgy and Metallograpy Having Supported Aluminum in 20 <sup>th</sup> Century	250
