	Page
SECTION I INTRODUCTORY PAPERS	
Opening Address	3
Titanium in U.S.A.	5
Titanium in Europe	11
SECTION II PROCESSING OF TITANIUM	
Part A Primary Fabrication	
Application of Solidification Theory to Titanium alloys	21
Research on the Quality of Commercially Pure Titanium and Ti-6Al-4V Ingots	35
Chemical and Structural Microinhomogeneity, Diffusion and Mechanical Properties of Titanium Alloys in Connection with Phase Transformation Characteristics	43
Choice of Vacuum-arc Melting Parameters to Ensure Ingot Chemical Homogeneity	57
Properties of Wrought Shapes Formed from Electroslag-melted Titanium	67
Titanium in the U.S.S.R.	75
Part B Secondary Fabrication	
Forgings in Titanium Alloys	79
The Beta Forging of Titanium Alloys	97
The Effect of Beta Processing on Properties of Titanium Alloys	111
Heavy Press Forging of Large Titanium Alloy Parts for Aircraft and Aerospace Applications	121
The Mono Graf Casting Process	133
Precision Casting of Titanium	143
Discussion Part A	149
Discussion Part B	151
SECTION III CHEMICAL AND ENVIRONMENTAL BEHAVIOR	
Part A General Corrosion and Oxidation	
Hydriding of Titanium Used in Chemical Plant and Protective Measures	155
Anodizing of Titanium Equipment	171
Reaction Rate of Titanium and Titanium Alloys with Titanium Lower Chlorides	179
The Oxidation of Titanium Films	189
Air Contamination and Embrittlement of Titanium Alloys	199
Corrosion Resistance of Titanium and Titanium -5% Tantalum Alloy in Hot Concentrated Nitric Acid	209
Utilization of Anodic Breakdown of Titanium Alloys as a Method of Characterization	217
Corrosion Test for Evaluating the Corrosion Resistance of Titanium	225
Titanium Electrode for the Manufacture of Electrolytic Manganese Dioxide	233
Part B Stress Corrosion	
Electrochemical Mechanism in the Stress Corrosion Cracking of Titanium Alloys	239
The Stress Corrosion Cracking of α -Titanium Alloys at Room Temperature	247
Some Characteristics of Aqueous Stress Corrosion in Titanium Alloys (Summary)	259
Ambient Temperature Stress Corrosion Cracking in Ti-8Al-1Mo-1V	263
Stress Corrosion Cracking in Titanium and Titanium Alloys	267
Stress Corrosion Cracking of Titanium and Ti-Al Alloys in Methanol-Iodine Solutions	283
Effects of Halogen Containing Hydrocarbons Upon Stressed Ti-6Al-4V Alloy	293
Cracking of Titanium Alloys under Stress during Oxidation in Air	299
Hot-salt Stress Corrosion Cracking of Titanium Alloys	307
Discussion Part A	321
Discussion Part B	324

SECTION IV PHYSICS, THERMODYNAMICS AND KINETICS	
Physical Properties of Titanium Alloys	331
The Crystallographic Structure of Ti ₃ Al	349
Thermodynamic Properties of the Body-centered Cubic Beta-phase in the Titanium-Copper and The Titanium-Aluminum Systems	259
Calculation of Regular Solution Phase Diagrams for Titanium Base Binary Systems	361
The Single Crystal Elastic Moduli of Beta-Titanium and Titanium-Chromium Alloys	373
Computer Experiments on Point Defect Configurations and Energies in Ti-M Systems	383
Behavior of Hydrogen in Titanium and Its Alloys by Internal Friction Measurement	393
Stress-induced Diffusion of Carbon and Oxygen in Titanium	401
Interaction of Titanium with Elements of the Periodic System	407
Discussion	419

SECTION V DEFORMATION AND FRACTURE	
Elastic Properties of Dislocations in Titanium	425
Elastic Interactions Between Dislocations and Twin and Grain Boundaries in Titanium	433
Strain Distribution in Oxidized Alpha Titanium Crystals	441
The Crystallography of Deformation Twinning in Titanium	453
Slip Modes and Dislocation Substructures in Titanium and Titanium-Aluminum Single Crystals	459
Interstitial Strengthening of Titanium Alloys	479
Effects of Interstitial Content and Grain Size on the Mechanical Behavior of Alpha Titanium Below 0.4 T _m	489
Athermal Plastic Deformation in Commercial Purity Titanium	503
Effect of Cyclic Stresses on Unalloyed Polycrystalline Titanium	517
Fatigue Behavior of α -Titanium and α -Titanium-Hydrogen Alloys	535
Deformation-assisted Nucleation of Titanium Hydride in an Alpha-Beta Titanium Alloys	545
The Temperature Dependence of Fracture Behaviour in α -Titanium-Hydrogen Alloys	557
Hydrogen Embrittlement of Titanium and its Alloys	561
Hydrogen Embrittlement of Titanium as a Part of the Problem of the Brittle-ductile Transition Temperature of Metals	577
Phase Transformations During Welding and the Mechanism of Delayed Cracking of Titanium Alloys	583
Transformation Plasticity of Titanium	597
The Hot Plasticity of Ti-6Al-4V	607
Superplasticity in Titanium	615
Discussions	625

SECTION VI PHASE TRANSFORMATIONS AND HEAT TREATMENT	
Part A Phase Transformations	
Some Aspects of Phase Transformations in Titanium Alloys	633
Mechanism of the Martensitic Transformation in Titanium and its Alloys	645
Martensitic Transformations in Titanium Alloys	659
The Effect of Cooling Rate on the Beta Transformation in Titanium-Niobium and Titanium- Aluminium Alloys	677
Thermodynamics of the M _s Points in Titanium Alloys	691
Continuous cooling-transformation of Beta-phase in Binary Titanium Alloys	695
Phase Transformation of Titanium Alloys by Means of Automatic Transformation Apparatus	699
The Morphology of the Omega Phase	711
The Stability of the Omega Phase in Titanium and Zirconium Alloys	719
Note on the Structure of the Omega Phase	739
An Electron Microscopy Study of phase Transformations in Titanium-Copper Alloys	733
Phase Relationships in Titanium-Oxygen Alloys	745
Part B Effect on Mechanical Properties	
The Martensitic Transformation in Titanium Binary Alloys and its Effect on Mechanical Properties	767
Using of the Jominy Test to Compare the Quench Hardenabilities of Titanium alloys Ti-6Al-4V and Ti-6Al-6V-2Sn	779
A Study of the Age Hardening Reaction in Titanium-2½% Copper	783
Thermo-mechanical Strengthening of High Strength Titanium Alloys	795

The Theoretical Bases of the Development of the High-Strength Metastable Beta-alloys of Titanium	809
Strengthening Mechanisms During the Heat Treatment of Three Titanium Alloys – Ti-6Al-4V, Ti-6Al-6V-2Sn and Ti-8Al-1V-1Mo	815
Strengthening of Titanium Alloys by Shock Deformation	817
Long Time Stability of Ti-679 after Creep Exposure for Times to 15,000 Hours	829
Effect of Elevated Temperature Exposure on the Room Temperature Properties of Titanium alloys 8Al-1Mo-1V, 6Al-4V and 4Al-3Mo-1V	839
The Development of the Structure and Mechanical Properties of Titanium Welds	843
Discussion Part A	847
Discussion Part B	848

SECTION VII ALLOYING OF TITANIUM

Part A Alloy Theory and Properties

Titanium Alloying in Theory and Practice	851
The Effect of the Group III Elements Al, Ga, and In on the Creep and Stress Rupture of Titanium at 500°C	861
Structure and Creep Properties of Ti ₇ NbAl ₃ -base Alloys	875
The Influence of Microstructure on the Mechanical Properties of Forged Alpha/Beta Titanium Alloys	879
Properties and Application of Ti-5Al-2Cr-1Fe Alloy (KS150B)	891
Influence of Carbon and Oxygen on Some Exploratory Ultra-high Strength Alpha-Beta Titanium Alloys	897
The Effect of Fabrication Variables on the Properties of Age-hardened Titanium-2½% Copper	901
The Weldability, Tensile and Fatigue Properties of Some Titanium Alloys	911
The Fatigue Properties of a High Strength Titanium Alloy (IMI.680)	923
Elasticity of Titanium Sheet Alloys	933

Part B Alloy Development

The Role of Depth Hardenability in the Selection of High Strength Alloys for Aircraft Application	945
Metallurgical Characteristics and Structural Properties of Ti-8Mo-8V-2Fe-3Al Sheet, Plate and Forgings	959
High Strength Titanium Alloys for Aircraft Gas Turbine Application	969
A Study of the Metallurgical Characteristics of Ti-6Al-6V-2Sn Alloy	979
The Development of a Superior Titanium-base Alloy for Cryogenic Applications	983
Exploitation of a Simple Alpha Titanium Alloy Base in the Development of Alloys of Diverse Mechanical Properties	987
Creep-resistant Titanium Alloys	1001
Discussion Part A and B	1009

SECTION VIII APPLICATION

Part A Techniques and Processes

Fatigue Characteristics of Titanium Alloy Forgings for Rotary Wing Vehicles	1013
High Voltage Electron Beam Welding of Titanium Alloys in Partial Vacuum	1023
Porosity in Argon Arc Welds in Titanium	1037
Submerged Arc Welding of Titanium	1047
Titanium Hot Forming	1049
Forming Ti-6Al-4V Sheet Metal in Four Heat Treated Conditions	1053
On the Explosive Bonding and Forming of Titanium	1065
The Production and Properties of Some Wear Resistant Coatings on Titanium – 4% Molybdenum – 4% Aluminum – 2% Tin Alloy (Hylite 50)	1081

Part B Application Experience

Titanium in Jet Engines	1099
The Application of Titanium Alloys in the Olympus 593 Engine for the Concorde SST	1117
Titanium Metal Fabrications in Aero Engines	1127
Titanium Application for Supersonic Airplanes	1143
Future Possibilities for Titanium in Primary Aircraft Structures	1149
Marine Applications of Titanium	1153
Titanium Applications – U.S. Army	1161
Titanium in the Process Industries Today	1169

Titanium alloy Pressure Vessels in the manned Space Program	1175
Discussion Part A	1187
Discussion Part B	1189
Name Index	1191
Subject Index	1197
