SLAG CHEMISTRY	
Session 1(a)	
Review Paper: Thermodynamics and Constitution of Silicate Slags	3
Research Papers:	
Thermodynamic Properties of the Masson Polymerization model of liquid silicates	12
Theoretical Treatment of activities in silicate melts	17
Activity in melts containing FeO, MnO, Al ₂ O ₃ , and SiO ₂	23
Mass Spectrometric determination of activities in the liquid PbO- SiO ₂ System	26
Effect of additions of oxides on the solubility of water in liquid CaO- SiO ₂	28
Diffusion in liquid slags	31
Discussion	35
Session 1 (b)	
Review Paper : Chemistry of CaF ₂ -based slags	43
Research Paper :	
Structural theories of ionic melts	52
Electroslag remelting processes	57
Parameters affecting the behaviour of sulphur during electroslag remelting	60
Removal of inclusions during electroslag refining	66
Discussion	69
REACTIONS AT INTERFACES	
Session 2	
Review Paper : Liquid-liquid reactions in steelmaking processes	77
Kinetics of reactions between gases and liquid metal	82
Research Paper :	
Electrochemical study of the slag-metal reaction	93
Solubility and kinetics of nitrogen solution in iron alloys at the temperatures of the 'reaction zone'	
In oxygen converters (2100-2500°C)	96
Transfer of carbon from a gas phase to molten iron	100
Shape and size of rising argon bubbles in liquid iron	104
Growth of carbon monoxide bubbles on refractory surfaces during vacuum degassing of iron melts	107
Role of interfacial tension in slag/metal reactions	110
Chemistry and kinetics of LD steelmaking	112
Discussion	114
LIQUID ALLOYS AND DESULPHURIZATION	
Session 3(a)	
Review Paper : Composition coordinates for the activities of Solute elements in dilute liquid Metallic solutions	121
Research Paper :	
Heat of Mixing of iron alloys	130
Activity measurements in binary metallic alloys with two volatile components	133
Session 3(b)	
Discussion	137
Review Paper : Desulphurization	139

Research Paper :	
Indirect electrolyte desulphurization	144
Discussion	148

DEOXIDATION

Session 4	
Review Paper : Deoxidation of Steel	153
Research Papers:	
Thermodynamic Stability of iron oxides	171
Effect of alloying elements on the solubility and activity of oxygen and sulphur in liquid iron at 1600°C	173
Determination of deoxidation thermodynamics in the Fe-V-O system using Solid Electrolytes	178
Oxidation and deoxidation in modern steel refining	184
Kinetic study of deoxidation of liquid steel	191
Study of the deoxidation of molten iron by an aluminium-silicon alloy	195
Deoxidation with Ba and Ca containing alloys	198
Discussion	202

SOLIDIFICATION

Session 5	
Review Paper : Some aspects of the solidification of ferrous alloys	207
Research Papers :	
Calculation of freezing and transformation ranges and equilibria in steels	215
On thermal natural convection in the two-phase region of a solidifying alloy	218
Solidification rates after a sudden change in cooling conditions	221
A mathematical model for the macrosegregation of alloying elements in vacuum-arc remelted ingots	225
Growth of blowholes during the solidification of iron base alloys	229
Homogenization of an alloy steel containing a liquated phase	233
Discussion	236

TRANSFORMATIONS

Session 6(a)	
Review Paper : Eutectoid transformation of austenite	241
Research Papers :	
Precipitation of austenite at ferrite grain boundaries in an iron -5% nickel alloy	248
Austenite to ferrite transformation in some iron-carbon-chromium alloys	255
Unidirectional growth of pearlite in steels	264
Effect of some alloy additions on the kinetics of pearlite growth	268
Effect of high manganese content on interlamellar spacing of isothermally transformed pearlite	272
Transformation of iron-nitrogen austenite to pearlite	275
Discussion	278
Session 6(b)	
Review Paper : Current assessment of the thermodynamics, structure, and nucleation of ferrous Martensite	282
Research Papers :	
Effects of specimen thickness on the temperature of nucleation of martensite in iron-nickel alloys	288
Role of magnetic transformations on the structure of iron alloys	292
Discussion	295

SOLID SUBSTITUTIONAL ALLOYS

Session 7	
Review Paper : Substitutional alloys of iron	301
Research Papers :	
Thermodynamics of solid Fe-Mn alloys and of Ta and Nb in γ -Fe	310

Interchange energies in Fe-Co solid solutions and their influence on order-disorder and segregation Processes	314
Order-disorder transitions in Fe-Si Solid Solutions and their dependence on the interchange Energies	317
Relationships between binary and ternary alloy properties : A calorimetric investigation of the Fe-Co-Ni system	322
Segregation of the solute elements sulphur, selenium , and tellurium in the grain boundaries of primary recrystallized 0.8% silicon-iron	327
Discussion	330

INTERSTITIAL ALLOYS

Session 8(a)	
Review Paper: Interstitial Solid solutions of iron	337

Research Papers :

Thermodynamic Aspect	
The ‘ surrounded atom’,as the basis of a quasichemical model of interstitial solution – applications to the thermodynamics of austenite	344
Some thermodynamic properties of interstitial alloyed austenite	348
Effect of substitutional alloying elements on the activity coefficients and behaviour of interstitial solutes in iron	351
Carbon activities in iron alloy austenites	353
A note on the interaction parameter C_{Cr}^C in austenitic chromium steels	356
Discussion	358

Session 8(b)

Research Papers :

Structural and kinetic aspects	
Kinetics of the carburization of iron in CH ₄ -H ₂ and of the nitrodenization in NH ₃ - H ₂	363
Kinetics of carbon exchange between a gas phase and solid iron-carbon-X-alloys	367
Mixed interstitial and substitutional atom clustering in metals. A new steel-strengthening Mechanism	371
Kinetics of nitriding iron alloys	374
Nitriding kinetics of Fe-Ti alloys	377
Effect of oxygen on the distribution of silicon nitride precipitates in iron	384
Discussion	387

HIGH-TEMPERATURE CORROSION

Session 9

Review Papers: Fundamental processes of metal oxidation at high temperatures and their significance in the oxidation of iron, iron alloys, and steels	395
---	-----

Research Papers :

Influence of adsorbed oxygen on the surface structure and on the kinetics of surface reactions on iron	412
Influence of Chloride contamination on the atmosphere on the mechanism of oxidation of iron	415
Discussion	419
Indexes	421
