

## CONTENTS

	Page	
Part One	Introduction	1
1.	Superalloy Progress	3
Part Two	Physical and Mechanical Metallurgy	31
2.	The Metallurgy of Nickel-Base Alloys	33
3.	Fundamentals of Strengthening	79
4.	The Metallurgy of Nickel-Iron Alloys	113
5.	Cobalt-Base Alloys	145
6.	Chromium-Base Alloys	175
7.	Dispersion Strengthening	197
8.	Microstructures and Properties of Superalloys	231
9.	The Occurrence of Topologically Close-Packed Phases	259
Part Three	Surface Stability	285
10.	High-Temperature Oxidation	287
11.	Hot Corrosion	317
12.	Coatings and Protection	341
Part Four	Process Metallurgy	371
13.	Melting	373
14.	Investment Casting	403
15.	Powder Metallurgy	427
16.	Mechanical Processing	451
17.	Solidification and Structure Control in Superalloys	479
18.	Joining	509
19.	Mechining the Superalloys	533
20.	The Future in Superalloys	565
Appendix A,	Phase Diagrams	577
Appendix B,	Superalloy Data	589
