Chapter 1 Introduction	
The field of Metallurgy	1
The Study of Metallurgy	3
Chapter 2 A Survey of Metallurgy	
How it began	4
The Middle Ages	7
Modern times	8
Metal-Forming methods	17
Problems	27
References	28
Chapter 3 Atomic Structure	
Introduction	29
Bohr Theory	29
Wave mechanics	33
Nuclear theory	37
Problems	40
References	40
Chapter 4 Crystal Structure	
Physical states	41
Space lattices and crystal systems	46
Methods of studying metal structures	51
Problems	64
References	65
Chapter 5 Equilibrium Diagrams	
Introduction	66
One-Component systems	67
Solid-solution systems	73
Eutectic systems	80
Peritectic systems	86
Intermediate phases	89
Solid-state reactions	91
Ternary systems	95
Gas-metal equilibrium	98
Typical industrial important equilibrium diagrams	100
Impurities in metals	111
Problems	112
References	113
Chapter 6 Structure of Alloys	
Introduction	114
Solid solutions	114
Intermediate phases	116
Structure of typical commercial alloys	116
Wear resistance	121
Machinability	127
Macrostructure of alloys	130
Problems	134

References	135
Chapter 7 Physical Properties	
Introduction	136
Electrical properties	136
Magnetic properties	140
Thermal properties	146
Optical properties	147
Problems	148
References	149
Chapter 8 Elasticity of Metals	
Introduction	150
Stress	150
Strain	154
Stress-Strain relations	156
Elastic properties of engineering alloys	158
Elastic Stresses in design	161
Problems	165
References	167
Chapter 9 Plasticity of Metals	
Introduction	168
Mechanisms of Plastic deformation	170
Stress-strain relation in plastic deformation	172
Fracture	178
Tests of plastic properties	178
Effects of plastic deformation	189
Problems	192
References	193
Chapter 10 Corrosion	
Introduction	194
Types of corrosion	194
Corrosion control	202
Problems	209
References	209
Chapter 11 Diffusion in Metals	
Introduction	210
Theory	210
Applications	216
Problems	219
References	220
Chapter 12 Recovery, Recrystallization, and Grain Growth	
Introduction	221
Grain Growth	221
Recovery	223
Recrystallization	225
Neocrystallization	230
Problems	232
References	233
Chapter 13 Age Hardening	
Introduction	234
Precipitation hardening	236
Order hardening	240
Diffusion-reaction hardening	242
Problems	243

References	244
Chapter 14 Heat Treatment of Steel	
Introduction	245
Equilibrium conditions	245
Nonequilibrium austenite decomposition	249
Hardening heat treatments	256
Tempering	263
Applications	265
Problems	270
References	271
Appendix Literature of Metallurgy	
Wanted : information	272
Literature sources	273
Problems	279
