

CONTENTS

	PAGE
CHAPTER 1. ACCURACY — INTERCHANGEABILITY — GAUGING	
Conditions and Synthesis of Accuracy—Interchangeability and Limit Systems—Newall and B.S. Systems—Selective Assembly Gauging—Limit Gauges—Indicating Gauges—Special and First Operation Gauges	1
CHAPTER 2. MEASUREMENT AND PRECISION WORK	
Slip Gauges—Comparator—Vernier Height Gauge—Marking Out—Vernier Micrometer—Examples of Measurement—Sine Bar—Angular Testing—Use of Rollers—Tapers—Projection	25
CHAPTER 3. MACHINE TOOLS	
Standard and Special Purpose Machines—Elements of Construction—Bed—Spindle—Speeds—Work Holding—Tool Attachment—Feeding—Tool Lubrication—Rigidity—Surface Formation—Machine-Tool Accuracy—Alignments—Testing	56
CHAPTER 4. FURTHER WORK ON THE LATHE	
Promotion of Accuracy—Examples—Taper Turning Attachment—Effect of Tool Height—Eccentric Turning—Form Turning—Collet Chuck—Multi-Start Screws—Leadscrew Accuracy—Quantity Production Methods—Square Tool Box—Leaving for Grinding—Boring on Saddle—Button Boring—Slotting	95
CHAPTER 5. MILLING	
Horizontal Machine—Cutter Support—Types of Cutters—Teeth—Helical—Relieved—End and Face Mills—Rotation—Feed—Choice of Cutter and Set-up—Care of Machine—Examples of Plain Milling—Fixtures—Slotting Attachment	123
CHAPTER 6. MILLING (continued)	
Dividing Head—Simple and Angular Indexing—Work Holding—Alignment—Examples of Work—Settings for Cutting Side, Taper and Clutch Teeth—Gear Cutting—Rack Cutting Attachment—Vertical Milling—Machine—Vertical Head—Equipment for Vertical Work—Examples—Jig Boring on Vertical Machine	155
CHAPTER 7. SHAPING, PLANING AND SLOTTING	
Hydraulic Shaper—Drive—Circuit Diagrams—Examples of Work—Use of Dividing Head—Planer—Table Drive—Electric Control—Tools and Support—Work Setting—Examples—Slotting Machine—Whitworth Motion—Slotter Tools—Examples of Work	185

CHAPTER 8. DRILLING AND BORING

Standard and Special Drills—Chucks—Quick Change Holders— Machines—Vertical—Radial—Sensitive—General Purpose Drill- ing—Examples—Drill Jigs—Design—Pacing—Counterboring— Deep Drilling—Horizontal Boring—Tools, Cutters and Bars— Facing—Setting up—Examples—Boring Fixtures—Vertical Boring Mill	217
--	------------

CHAPTER 9. GRINDING

Scope of Process—Wheel—Abrasive, Artificial and Natural—Manu- facture—Bond—Types of Bond—Grit and Grade—Wheel Manu- facture — Structure — Shape — Classification — Selection — Wheel Mounting—Truing and Dressing—Speeds—Faults—Hand Grinding—Tools—Lathe Grinding Attachments—Cylindrical Grinding—Speed and Peed—Machine and its Construction— Steadies—Vibration—Operation of Machine—Taper Grinding .	251
---	-----

CHAPTER 10. GRINDING (continued)

Internal Grinding — Machine — Internal Spindles — Wheels — Examples of Work — Surface Grinding — Methods — Disc and Ring Wheels — Magnetic Chuck — Types of Surface Machines — Hydraulic Driving — Examples of Surface Grinding — Tool and Cutter Grinder — Setting and Sharpening Various Cutters — Cutting off by Abrasive Wheel — Oilstones — Grinding Wheel Recommendations . . .	286
