

Contents

For a more detailed Table of Contents, see page xii.

Fundamentals of Corrosion	1
Introduction to the Fundamentals of Corrosion	3
Fundamentals of Corrosion Thermodynamics	
Introduction to Fundamentals of Corrosion Thermodynamics	5
Electrode Processes	6
Electrode Potentials	8
Potential Measurements with Reference Electrodes	13
Potential versus pH (Pourbaix) Diagrams	17
Molten Salt Corrosion Thermodynamics	31
Geochemical Modeling	34
Fundamentals of Aqueous Corrosion Kinetics	
Kinetics of Aqueous Corrosion	42
Aqueous Corrosion Reaction Mechanisms	52
Passivity	61
Methods for Determining Aqueous Corrosion Reaction Rates	68
Fundamentals of Gaseous Corrosion	
Introduction to Fundamentals of Corrosion in Gases	87
Thermodynamics of Gaseous Corrosion	90
Kinetics of Gaseous Corrosion Processes	97
Gaseous Corrosion Mechanisms	106
Methods for Measuring Gaseous Corrosion Rates	115
Fundamentals Applied to Specific Environments	
Corrosion in Molten Salts	117
Corrosion in Molten Nitrates, Nitrites, and Fluorides	124
Corrosion by Liquid Metals	129
Fundamentals of Corrosion for Constructive Purposes	
Introduction to Corrosion for Constructive Purposes	135
Electropolishing	139
Electrochemical Machining	143
Electrochemical Allied Processes	153
Electrochemical Hybrid Processes	157
Electrochemical Refining	160
Chemical-Mechanical Planarization for Semiconductors	164
Anodes for Batteries	170
Fuel Cells	178
Forms of Corrosion	187
Introduction to Forms of Corrosion	189
Uniform Corrosion	
Aqueous Corrosion	190
Atmospheric Corrosion	196
Galvanic Corrosion	210
Stray-Current Corrosion	214
Molten Salt Corrosion	216
Liquid Metal Corrosion	220
High-Temperature Gaseous Corrosion	228
Localized Corrosion	
Pitting Corrosion	236
Crevice Corrosion	242
Filiform Corrosion	248
Metallurgically Influenced Corrosion	
Introduction to Metallurgically Influenced Corrosion	257
Effects of Metallurgical Variables on Aqueous Corrosion	258
Effects of Metallurgical Variables on the Corrosion of Stainless Steels	266
Effects of Metallurgical Variables on the Corrosion of Aluminum Alloys	275
Effects of Metallurgical Variables on the Corrosion of High-Nickel Alloys	279
Effects of Metallurgical Variables on Dealloying Corrosion	287
Corrosion of Carbon Steel Weldments	294
Corrosion of Stainless Steel Weldments	301
Corrosion of Nonferrous Alloy Weldments	317
Mechanically Assisted Degradation	
Forms of Mechanically Assisted Degradation	322
Aqueous Corrosion-Wear Interactions	331
Gaseous Corrosion-Wear Interactions	338
Environmentally Induced Cracking	
Introduction to Environmentally Induced Cracking	345
Stress-Corrosion Cracking	346
Hydrogen Damage	367
Liquid Metal Induced Embrittlement	381
Solid Metal Induced Embrittlement	393
Microbiologically Influenced Corrosion	
Microbiologically Influenced Corrosion	398
Corrosion Testing and Evaluation	417
Introduction to Corrosion Testing and Evaluation	419
Planning Corrosion Tests and Evaluating Results	
Designing, Planning, and Preparing Corrosion Tests	420
Statistical Interpretation of Corrosion Test Results	425
Modeling Corrosion Processes	430
Laboratory Corrosion Tests	
Electrochemical Methods of Corrosion Testing	446
Immersion Testing	463
Cabinet Testing	470
Microbiologically Influenced Corrosion Testing	478
Simulated Service Corrosion Testing	
Simulated Service Testing in the Atmosphere	487
Simulated Service Testing in Water	495
Simulated Service Testing in Soil	497

<i>In-Service Techniques for Damage Detection and Monitoring</i>		<i>Metal Coatings</i>	
In-Service Techniques—Damage Detection and Monitoring	501	Electroplated Coatings	
Electrochemical Techniques for In-Service Corrosion Monitoring ...	509	Continuous Hot Dip Coatings	
Corrosion Monitoring Techniques	514	Batch Process Hot Dip Galvanizing	
Monitoring of Localized Corrosion	519	Thermal Spray Coatings	
Infrared Imaging for Corrosion, Disbondments, and Cracks	525		
Corrosion Monitoring Using Microwave and Guided Wave		<i>Coatings and Linings</i>	
Nondestructive Evaluation	529	Introduction to Coatings and Linings	
Corrosion Monitoring for Industrial Processes	533	Organic Coatings and Linings	
		Zinc-Rich Coatings	
		Paint Systems	
		Rubber Coatings and Linings	
<i>Evaluating Forms of Corrosion</i>		<i>Electrochemical and Corrosion Control Methods</i>	
Evaluating Uniform Corrosion	542	Anodic Protection	
Evaluating Pitting Corrosion	545	Cathodic Protection	
Evaluating Crevice Corrosion	549		
Evaluating Galvanic Corrosion	562	<i>Corrosion Inhibitors</i>	
Evaluating Intergranular Corrosion	568	Vapor Phase Corrosion Inhibitors	
Evaluating Exfoliation Corrosion	572	Corrosion Inhibitors for Oil and Gas Production	
Evaluating Stress-Corrosion Cracking	575	Corrosion Inhibitors for Crude Oil Refineries	
Evaluating Hydrogen Embrittlement	617	Corrosion Inhibitors in the Water Treatment Industry	
Evaluating Corrosion Fatigue	625		
Evaluating Erosion Corrosion, Cavitation, and Impingement	639	<i>Designing for Corrosion Control and Prevention</i>	
Evaluating Microbiologically Influenced Corrosion	644	Materials Selection for Corrosion Control	
High-Temperature Gaseous Corrosion Testing	650	Designing to Minimize Corrosion	
		Corrosion Economic Calculations	
		Predictive Modeling of Structure Service Life	
		Direct Costs of Corrosion in the United States	
Methods of Corrosion Protection	683	<i>Tools for the Corrosionist</i>	
Introduction to Methods of Corrosion Protection	685	Introduction to Tools for the Corrosionist	
		Statistics for the Corrosionist	
		Materials Basics for the Corrosionist	
		Applications of Modern Analytical Instruments in Corrosion	
		Information Sources and Databases for the Corrosionist ...	
		Conventions and Definitions in Corrosion and Oxidation ..	
<i>Corrosion Resistance of Bulk Materials</i>		<i>Reference Information</i>	
Introduction to Corrosion Resistance of Bulk Materials	687	Glossary of Terms	
Corrosion Resistance of Aluminum Alloys	689	Corrosion Rate Conversion	
Corrosion Resistance of Magnesium Alloys	692	Metric Conversion Guide	
Corrosion Resistance of Stainless Steels and Nickel Alloys	697	Abbreviations and Symbols	
Corrosion Resistance of Titanium Alloys	703	Index	
<i>Surface Treatments and Conversion Coatings</i>			
Phosphate Conversion Coatings	712		
Chromate and Chromate-Free Conversion Coatings	720		
Aluminum Anodizing	736		
Surface Modification Using Energy Beams	741		
<i>Ceramic, Glass, and Oxide Coatings</i>			
Porcelain Enamels	750		
Chemical-Setting Ceramic Linings	755		
CVD and PVD Coatings	759		
Pack Cementation Coatings	763
