Preface 5

Chapter I. **Physical Characteristics** 7
1. Mechanical Characteristics 7
2. Thermal Characteristics 8
3. Electrical Characteristics 9
4. Some Properties of Elements and Materials Dealt with in Heat-treatment of Metals 10

Chapter II. **Quality Control of Metals** 13
1. Hardness Tests 13
2. Detection of Cracks in Metals 22
3. Approximate Determination of Steel Composition . . . 24

Chapter III. **Steel** 26
1. Constituents of Steel 26
2. Structure of Iron and Steel. Equilibrium Diagram of Iron-carbon Alloys 26
3. Alloying Elements and Their Effect on the Properties of Steel 31
4. Chemical Composition and Hardness of Market Steels . 31
5. Common Uses of Various Grades of Steels and Alloys . 61

Chapter IV. **Heat-treatment of Steel** 74
1. Heating of Steel 74
2. Oxidation and Decarburisation on Heating 76
3. Annealing 78
4. Normalising 81
5. Hardening 81
6. Tempering 93

Chapter V. **Case-hardening** 104
1. Carburising 104
2. Nitriding 113
3. Cyaniding 116
4. Calorising 122
5. Sulphiding (sulphating) 122
6. Cleaning and Pickling of Articles after Heat-treatment 128
7. Anticorrosion Protection for Articles after Heat-treatment 129

Chapter VI. **Heat-treatment Technology** 130
1. Approximate Heat-treatment Schedules and Mechanical Properties of Various Grades of Steels 130
2. Practical Hints on Heat-treatment of Articles 161

Chapter VII. **Heat-treatment of Cast Iron** 197

Chapter VIII. **Heat-treatment of Non-ferrous Metals** 201

Chapter IX. **Forging of Ferrous and Non-ferrous Metals** 223
1. Forging of Steel 223
2. Forging of Non-ferrous Metals 230

Chapter X. **Manufacture of Built-up Cutting Tools** 234

Chapter XI. **Equipment, Fuel and Accessory Materials for Heat-treatment Shops** 243
1. Furnaces 243
2. Refractories 252
3. Fuel 252
4. Temperature Control Instruments 254

Chapter XII. **Safety Engineering** 268

INDEX 272
