FRONTISPIECE: SEQUENCES FOR PLATING ON PLASTICS, LEAVES, ETC.	
ABOUT THE AUTHOR	v
PREFACE	vii
PART 1. GENERAL NOTES	
1 WHY ELECTROPLATE PLASTICS ? Economics of plating on plastics	1
2 METHODS OF METALLIZING Vacuum metallizing and sputtering - Chemical and metal spraying - Hot metal dipping - Electroless deposition - Metal impregnation - Vacuum foil bonding - Electroplating	4
3 APPLICATIONS IN INDUSTRY Advantages of plated plastics - Disadvantages of plated plastics - Applications in industry	9
4 PRINCIPLE OF THE PLATING PROCESS Design for plating - The moulding	14
5 LOOKING AHEAD New resins - All-nickel sequences - Automatic installations - Increased application for gold	18
PART 2. BARREL PLATING OF SMALL ARTICLES	
6 MATERIALS AND DESIGN FOR BARREL PLATING Materials for barrel plating - Design for barrel plating - Relation between design and finish	22
7 SURFACE PREPARATION Degreasing - Depolishing - Conditioning	29

8	CHEMICAL SILVERING	34
	Plant lay-out - Rinsing before sensitizing - Sensitizing - Chemical silver reduction - Reclaiming the silver sludge - Testing the silver coating	
9	BARREL COPPER PLATING	51
	Reason for copper plating - Plant for barrel copper plating - Operating the unit - Copper plating - Unloading the barrels - Defects and remedies - Servicing and maintenance of copper plating plant - Processing polystyrene - Barrel plating nylon	
10	PRODUCTION PROGRAMMING	72
11	NICKEL PLATING	74
	Pre-treatment of copper plated articles - Barrel nickel plating plant	
12	GOLD PLATING	79
13	OTHER FINISHES	82
	Oxidised bright nickel - Oxidised gold - Plain copper - Oxidised copper - Brass - Oxidised brass - Florentine bronze - Real silver - Oxidised silver - Gunmetal - Tin or pewter finish	
14	LACQUERING	91
15	QUALITY CONTROL AND INSPECTION	93
16	REPROCESSING OF REJECT PARTS	96
	Nitric acid stripping - Ferric chloride stripping	
17	WEEKLY MAINTENANCE	98
18	SAFETY AND HEALTH PRECAUTIONS	100
19	PACKING, WEIGHING AND DESPATCH	102

PART 3. SPRAY SILVERING

20	PRINCIPLES AND GENERAL NOTES	104
	Types of articles that can be processed - Factory layout and plant Pre-treatment - Chemical spraying - Racking for silver spraying - Jigging for electroplating - Shiny spray finishes - Copper plating and polishing - Storage and packing - Mass production processing	
21	PROCESSING BY SILVER SPRAYING	109

22	PROCESSING OF NATURAL PRODUCTS AND LEAVES	123
	Selecting the leaves – Preparation for plating – Plating procedure	
23	PROCESSING OF WAVEGUIDES, PRINTED CIRCUITS, ELECTROFORMS AND SPECIAL PRODUCTS	128
	PART 4. VAT PLATING OF MEDIUM SIZE AND LARGE ARTICLES	
24	PRINCIPLES, MATERIALS AND DESIGN	130
	Principle – Output – Moulding material and surface quality – Moulding procedure – Design factors	
25	BOND STRENGTH	137
	Bonding mechanism – Heating increases the bond – Peel strength – Quality control	
26	CHEMICAL TREATMENTS	143
	Plant layout – Conditioning solution – Conditioning procedure – Sensitizing – Chemical coppering – Storage of parts between operations	
27	ELECTROPLATING OF VAT-TREATED PARTS	153
	Jigging for plating – Masking for selective plating – Pretreatment for bright copper electroplating – Bright copper plating – Bright nickel plating – Defects – Chromium – Other finishes – De-jigging, inspection and packing – Specification plating – Environmental and associated tests – Factory construction and lay-out	
28	PROGRESS PLANNING AND LAYOUT	182
	PART 5. COSTING AND ESTIMATING	
29	COSTING FOR BARREL PLATING	185
	Operating costs – Processing costs – Estimated earning capacity – Fixing a selling price	
30	COSTING FOR VAT PLATING	191
	Earning capacity – Operating and processing costs	
31	COSTING FOR SPRAY SILVERING	196
32	CAPITAL EXPENDITURE	198
	Barrel plating plant – Vat plating plant	
33	SOME THOUGHTS ON AUTOMATION	201
	INDEX	204
