

# CONTENTS

## PART 1

### INTRODUCTION AND PREPARATION OF MATERIALS

<b>1.</b>	<b>The Composition of Wood</b> .....	<b>3</b>
	I. Introduction.....	3
	II. The Nature of Wood.....	3
	A. The Tree.....	3
	B. The Structure of Wood.....	4
	C. Defects in Wood.....	6
	/III. The Chemical Nature of Wood.....	7
	/IV. Separation of Wood Components and Methods of Analysis.....	9
	V. Summative Analysis.....	12
	VI. Sources of Methods.....	16
	References.....	18
<b>2.</b>	<b>Laboratory Methods and Techniques</b> .....	<b>19</b>
	I. Common Laboratory Operations.....	19
	A. Drying.....	19
	1. Oven Drying.....	19
	2. Vacuum Drying.....	20
	3. Solvent Exchange.....	20
	4. Retention of Solvents.....	20
	5. Freeze Drying.....	21
	6. Chemical Drying Agents.....	21
	B. Evaporation.....	23
	C. Filtration.....	23
	D. Extraction.....	24
	1. Extraction of Solids.....	24
	2. Extraction of Liquids.....	24

## CONTENTS

E.	Solvents	25
1.	Purification and Testing	25
2.	Hazards in Use of Solvents	29
II.	Chromatography	30
A.	Principles	30
B.	Paper Chromatography	30
1.	Cellulose Papers	31
2.	Glass Papers	31
C.	Thin-Layer Chromatography	32
D.	Spray Reagents	33
E.	Column Chromatography	34
F.	Gas Chromatography	35
G.	Ion-Exchange	36
1.	Columns	36
2.	Papers	37
H.	Electrochromatography	38
III.	Spectrophotometry	38
A.	Scope	38
B.	Units and Definitions	39
C.	The Practice of Spectrophotometric Measurements	40
D.	Determination of Spectra	41
E.	Spectrophotometric Analysis	41
	References	42
<b>3.</b>	<b>Sampling and Preparation of Samples</b>	<b>45</b>
I.	The Problem of Sampling	45
II.	Selection of the Sample	46
III.	Reduction of the Sample to a Subsample (Test Sample)	47
IV.	Preparation of the Test Sample	48
V.	Reduction of Particle Size	49
VI.	Screening	50
VII.	TAPPI Method for Sample Preparation	51
VIII.	Drying and Storing of Samples	52
IX.	Sampling from Standing Trees	52
X.	Sampling of Pulp	53
XI.	Grinding and Defiberizing of Pulp	54

XII. Fine Grinding of Wood.....	55
References.....	56
<b>4. Determination of Water.....</b>	<b>59</b>
I. The Hygroscopicity of Wood.....	59
II. Determination of the Water (Moisture) Content of Wood.....	59
III. Oven Drying.....	60
IV. Vacuum Drying.....	62
V. Distillation.....	62
VI. Karl Fischer Titration.....	65
VII. Other Methods for the Determination of Water... ..	69
A. Chemical Methods.....	69
B. Physical Methods.....	69
1. Electrical Methods.....	69
2. Hygrometers.....	71
3. Nuclear Magnetic Resonance.....	71
4. Nuclear Radiation Techniques.....	71
References.....	71

## PART 2

### EXTRANEOUS COMPONENTS

<b>5. The Extraneous Components of Wood.....</b>	<b>75</b>
I. Definitions and Scope.....	75
II. Isolation of the Extractives.....	75
A. Materials Volatile with Steam.....	77
B. Extractives Soluble in Organic Solvents.....	79
C. Extractives Soluble in Water.....	81
III. Preparation of Extractive-Free Wood.....	83
IV. Extractives in Wood Pulp.....	83
A. Pitch.....	83
B. Water-Soluble Substances.....	86
V. Extraction of Wood with Alkaline Solutions.....	87
VI. Inorganic Constituents.....	87
A. Determination of Ash.....	87
B. Sulfate Ash.....	88
References.....	89

<b>6. Examination of Volatile Components.....</b>	<b>91</b>
I. Nature of the Volatile Components.....	91
A. Volatile Oils.....	91
B. Turpentine.....	91
II. Methods of Isolation.....	92
A. Isolation from Wood and Other Tree Parts...	92
B. Isolation of Turpentine from Oleoresins.....	93
III. Separation of the Volatile Components.....	96
A. Fractional Distillation.....	96
B. Chemical Methods.....	98
C. Adsorption and Chromatography.....	99
D. Gas Chromatography.....	100
IV. Identification of the Volatile Components.....	105
V. Determination of Volatile Components.....	108
VI. Testing of Turpentine.....	110
References.....	110
<b>7. Examination of Components Soluble in Organic Solvents. 115</b>	<b>115</b>
I. Nature of the Soluble Materials.....	115
II. Methods of Extraction.....	115
A. Preparation of Sample.....	116
B. Solvents.....	116
C. Extraction Procedure.....	116
D. Preliminary Solvent Separations.....	117
III. Methods of Separation.....	118
A. General Schemes of Separation.....	118
B. Separation of Acid and Neutral Fractions....	123
C. Separation of Acids and Unsaponifiable Matter	127
D. Isolation of Fatty and Resin Acids.....	128
E. Separation of Fatty and Resin Acids.....	129
References.....	129
<b>8. Examination of the Fatty Acid Fraction.....</b>	<b>131</b>
I. Nature of the Fatty Acids.....	131
II. Chemical Methods of Analysis.....	132
A. Unsaponifiable Materials.....	132
B. Saponification Value.....	134
C. Acid Number.....	135
D. Iodine Value.....	136

III.	Separation of the Fatty Acids.....	138
	A. Separation of Saturated and Unsaturated Acids	138
	B. Formation of Urea Complexes.....	140
	C. Oxidized Acids.....	141
	D. Identification of the Acids.....	142
IV.	Chromatographic Methods.....	142
	A. Column Chromatography.....	143
	B. Paper Chromatography.....	145
	C. Thin-Layer Chromatography.....	146
	D. Gas-Liquid Partition Chromatography.....	148
	1. Techniques.....	148
	2. Identification.....	149
	3. Determination.....	151
	4. Preparation of Esters.....	151
V.	Spectrophotometric Methods.....	154
	A. Ultraviolet Spectra.....	154
	B. Alkaline Isomerization Method for Unsaturated Acids.....	155
	C. Infrared Spectra.....	156
	References.....	156
9.	Examination of the Resin Acid Fraction.....	161
	I. Nature and Properties of the Resin Acids.....	161
	II. Isolation of the Resin Acids.....	162
	III. Methods of Testing and Analysis.....	164
	A. Grading of Rosin.....	164
	B. Acid Number.....	165
	C. Saponification Number.....	165
	D. Unsaponifiable Matter.....	166
	E. Volatile Oil in Rosin.....	167
	IV. Separation of the Resin Acids.....	167
	A. Separation as Amine Salts.....	168
	B. Isolation of Abietic Acid.....	169
	C. Isolation of Isopimaric Acid.....	170
	D. The Diels-Alder Reaction.....	171
	E. Total Dihydro Acids.....	172
	V. Chromatography.....	172
	A. Column.....	172
	B. Paper.....	175

	C. Thin-Layer.....	176
	D. Gas-Liquid.....	178
VI.	Spectrometry.....	179
	A. Ultraviolet Spectrometry.....	179
	B. Infrared Spectrometry.....	180
	C. Mass Spectrometry.....	181
VII.	Dehydrogenation.....	182
VIII.	Color Reactions.....	182
	A. The Liebermann Reaction.....	183
	B. The Cohen Reaction.....	184
	C. The Halphen-Hicks Reaction.....	184
	D. Dehydroabiatic Acid.....	185
	E. Diazotized p-Nitroaniline.....	185
	References.....	186
<b>10.</b>	<b>Tall Oil.....</b>	<b>189</b>
	I. Estimation of Potential Tall Oil Yield.....	190
	A. From Wood.....	190
	B. From Sulfate Black Liquor.....	190
	II. Analysis of Tall Oil Skimmings.....	191
	III. Analysis of Tall Oil.....	193
	A. Separation and Determination of Fatty and Resin Acids.....	194
	B. ASTM Methods for Analysis.....	195
	1. Moisture.....	195
	2. Acid Number.....	195
	3. Saponification Number.....	196
	4. Resin Acids.....	197
	5. Unsaponifiable Matter.....	197
	6. Fatty Acids.....	199
	IV. Analysis of Tall Oil Products.....	199
	A. Determination of Resin Acids in Fatty Acids..	199
	B. Determination of Fatty Acids in Tall Oil Rosin	203
	V. Tall Oil Components.....	203
	A. Characterization of Fatty and Resin Acids....	203
	B. Unsaponifiable Matter.....	204
	References.....	205

<b>11. The Unsaponifiable Substances</b> . . . . .	207
I. Isolation . . . . .	207
II. Separation . . . . .	207
III. Aliphatic Monohydric Alcohols . . . . .	210
IV. Glycerol . . . . .	211
A. Chromatography and Periodate Oxidation . . . . .	211
B. Periodate Oxidation . . . . .	213
C. The Copper Complex . . . . .	213
D. Gas-Liquid Chromatography . . . . .	214
V. Sterols . . . . .	214
A. Isolation . . . . .	214
B. Analysis . . . . .	216
1. Precipitation by Digitonin . . . . .	216
2. The Liebermann-Burchard Test . . . . .	217
C. Chromatography . . . . .	218
D. Infrared Spectra . . . . .	218
VI. Di- and Triterpenes and Terpenoids . . . . .	219
A. Squalene . . . . .	219
B. Triterpene Alcohols . . . . .	220
VII. The Unsaponifiable Matter of Rosin . . . . .	220
References . . . . .	221
<b>12. Phenolic Substances</b> . . . . .	223
I. Isolation . . . . .	223
II. Color Reactions . . . . .	224
A. Spray Reagents . . . . .	225
B. Other Color-Forming Tests . . . . .	228
III. Chromatographic Developing Systems . . . . .	230
IV. Some Classes of Phenolic Compounds . . . . .	232
A. Alcohols, Aldehydes, Ketones, and Acids . . . . .	232
B. Lignans . . . . .	233
C. Stilbenes . . . . .	234
D. Flavonoids . . . . .	234
1. Flavones and Related Compounds . . . . .	235
2. Anthocyanins and Related Compounds . . . . .	238
E. Tropolones . . . . .	240
V. Tannins . . . . .	240
A. Determination of Tannin . . . . .	240
1. ALCA Method . . . . .	241

2. Other Methods.....	247
B. Purification of Tannins.....	247
C. Chromatography.....	247
References.....	249
<b>13. Components Soluble in Water.....</b>	<b>253</b>
I. Sugars and Oligosaccharides.....	253
II. Polysaccharides.....	254
A. Pectic Substances.....	254
B. Starch.....	257
C. Arabinogalactans.....	259
✓ III. Glycosides.....	260
IV. Cyclitols.....	261
V. Organic Acids.....	262
VI. Proteins.....	263
VII. Alkaloids.....	264
A. Nature and Sources.....	264
B. Isolation.....	264
C. Detection and Identification.....	265
References.....	268

### PART 3

#### GENERAL PROCEDURES

<b>14. Staining and Color Reactions.....</b>	<b>273</b>
I. Lignified Tissues and Lignin.....	273
A. Reaction with Mineral Acids.....	273
B. Methanol-Hydrochloric Acid Color Reaction..	274
C. Reaction with Phenolic Compounds.....	274
D. Reaction with Amines.....	275
E. Reaction with Heterocyclic Compounds.....	276
F. Reaction with Carbonyl Compounds.....	276
G. The Maule Test.....	277
II. Carbohydrates.....	278
A. Anthrone Reaction.....	278
B. Molisch Test.....	279
C. Pectic Substances.....	280
III. Differentiation of Heartwood and Sapwood.....	280

IV. Miscellaneous Stains.....	282
A. Wood.....	282
B. Fibers.....	282
References.....	284
<b>15. The Examination of Bark.....</b>	<b>287</b>
I. Sampling and Preparation of Sample.....	287
II. Extractives.....	288
III. Hydroxy Acid Complexes.....	290
IV. Lignin.....	291
A. Phenolic Acids.....	292
B. Examination of the Phenolic Acid Fraction... ..	293
C. Alkali-Resistant Lignin.....	294
V. Carbohydrates.....	294
A. Carbohydrate Preparations.....	294
B. Starch.....	295
C. Pectic Materials.....	295
D. Hemicelluloses.....	296
E. Cellulose.....	297
VI. Summative Analysis.....	297
References.....	298
<b>16. Special Methods.....</b>	<b>301</b>
I. Inorganic Constituents.....	301
II. Acidity of Wood.....	303
III. Peroxides in Cellulose.....	304
IV. Charcoal.....	304
V. Wood-Preservative Treatments.....	305
A. Creosote.....	305
B. Pentachlorophenol.....	307
C. Analysis for Elements.....	309
1. Arsenic.....	309
2. Boron.....	310
3. Mercury.....	311
4. Zinc.....	312
5. Chromium.....	312
6. Chlorine.....	312
7. Fluorine.....	313
References.....	314

<b>17. Sorption and Swelling</b> .....	<b>317</b>
I. Sorption of Water Vapor .....	<b>317</b>
A. At Constant Relative Humidity .....	<b>318</b>
1. Procedures for Control of Relative Humidity .....	<b>319</b>
2. Static Conditions .....	<b>320</b>
3. Dynamic Conditions .....	<b>324</b>
B. Measurement by Addition or Removal of Water .....	<b>325</b>
II. Swelling .....	<b>325</b>
A. Swelling of Wood .....	<b>325</b>
B. Swelling of Cellulose Fibers .....	<b>327</b>
1. Microscopic Method .....	<b>327</b>
2. Dilatometer Method .....	<b>328</b>
3. Centrifuge Method .....	<b>328</b>
4. Hydrodynamic Specific Volume .....	<b>329</b>
III. Measurement of Surface Area .....	<b>330</b>
A. Microscopic Method .....	<b>330</b>
B. Hydrodynamic Specific Surface .....	<b>330</b>
C. Surface Catalytic Method .....	<b>330</b>
D. Adsorption from Solution .....	<b>331</b>
E. Gas Adsorption Methods .....	<b>332</b>
References .....	<b>333</b>
<b>18. Density and Specific Gravity</b> .....	<b>335</b>
I. Specific Gravity of Wood .....	<b>336</b>
A. Immersion or Buoyancy Methods .....	<b>337</b>
1. By Change in Weight of Liquid .....	<b>337</b>
2. By Change in Weight of Specimen .....	<b>339</b>
B. Measurement of Volume by Displacement .....	<b>344</b>
1. In Mercury .....	<b>344</b>
2. In Organic Solvents .....	<b>346</b>
C. Direct Measurement of Volume .....	<b>346</b>
1. On Wood Blocks .....	<b>346</b>
2. On Increment Cores .....	<b>346</b>
D. The Maximum Moisture Content Method .....	<b>347</b>
E. Rapid Flotation Method .....	<b>349</b>

II. Density of Wood and Cellulose . . . . .	349
A. Displacement Methods . . . . .	349
1. Pycnometer Method . . . . .	349
2. Volumenometer Method (Helium) . . . . .	351
B. Buoyancy Methods . . . . .	352
C. Flotation Methods . . . . .	352
1. Direct Method . . . . .	352
2. Density Gradient Tube . . . . .	353
III. Density of Cell-Wall Substance . . . . .	354
References . . . . .	356
