

SCIENTIFIC PROGRAMME

	Page
Biogenesis and constitution of lignin—K. FREUDENBERG (<i>Germany</i>)	9
Biogenesis of carbohydrates in wood—J. K. N. JONES (<i>Canada</i>)	21
Chemical and morphological aspects of the fine structure of wood— H. MEIER (<i>Sweden</i>)	37
The chemical structure of the hemicelluloses—E. L. HIRST (<i>U.K.</i>)	53
Recent advances in methods of isolating and purifying hemicelluloses —B. LINDBERG (<i>Sweden</i>)	67
Fractional extraction and properties of hemicelluloses—K. WARD Jr. and A. J. MORAK (<i>U.S.A.</i>)	77
Modern methods of determining crystallinity in cellulose—J. MANN (<i>U.K.</i>)	91
Application of infra-red spectroscopy to cellulose and wood polysac- charides—R. H. MARCHESSAULT (<i>U.S.A.</i>)	107
Cellulose as a viscoelastic material—A. H. NISSAN and S. S. STERNSTEIN (<i>U.S.A.</i>)	131
Chemical mechanisms in the grafting of cellulose—J. J. HERMANS (<i>U.S.A.</i>)	147
Recent developments and present trends in sulphite pulping— L. STOCKMAN (<i>Sweden</i>)	165
New information on the reactions of lignin in kraft pulping— T. ENKVIST, T. ASHORN and K. HÄSTBACKA (<i>Finland</i>)	177
The behaviour of wood carbohydrates in technical pulping processes —J. K. HAMILTON (<i>U.S.A.</i>)	197
The chemistry of delignification in pulp bleaching—K. V. SARKANEN (<i>U.S.A.</i>)	219
The physical chemistry of lignin—D. A. I. GORING (<i>Canada</i>)	233
