

TABLE OF CONTENTS

<i>Preface</i>	v
<i>Introduction</i>	vii
Chapter 1 The Nebulous Concept of Lignin	1
1-1. DEFINITION OF LIGNIN	2
1-2. DISTRIBUTION OF LIGNIN	4
1-3. ADDITIONAL READING	5
REFERENCES	6
Chapter 2 The Isolation of Lignin	7
2-1. ISOLATION METHODS OF FIRST CLASS DEPEND- ING UPON REMOVAL OF CELLULOSE	8
A. Sulfuric Acid Lignin	9
B. Hydrochloric Acid Lignin	10
C. Other Acid Lignins	11
D. Cuprarmonium Hydroxide Lignin	11
E. Periodate Lignin	13

2-2.	ISOLATION METHODS OF SECOND CLASS WHICH REMOVE LIGNIN AND LEAVE CELLULOSE	13
	A. Organosolv Lignins	14
	B. Lignins Isolated with Inorganic Reagents	18
2-3.	ATTEMPTS TO ISOLATE LIGNIN IN THE UN-CHANGED FORM	32
	A. Brauns' Isolated Native Lignin	32
	B. Enzymatically Liberated Lignins	34
	C. Milled-Wood Lignins	35
2-4.	DETERMINATION OF LIGNIN	37
	A. Direct Methods	38
	B. Indirect Methods	47
	C. Lignin in Solution	52
2-5.	QUALITATIVE ANALYSIS AND COLOR REAC-TIONS OF LIGNIN	58
	REFERENCES	58
Chapter 3	The Chemical Structure of Lignin	65
3-1.	EVOLUTION OF THE PRESENT-DAY STATUS OF KNOWLEDGE OF THE MONOMERIC UNIT AND SIDE-CHAIN CONFIGURATION OF LIGNIN	65
3-2.	LINKAGES BETWEEN MONOMERIC UNITS	68
	A. Degradation Studies	68
	B. Model-Compound Studies	72
	C. Synthetic Studies	91
	D. New Physical Approaches	102
3-3.	FORMULATION FOR LIGNIN	106
	A. First Formulation of Brauns	106
	B. Erdtman's Formulation	106
	C. First Formulation of Adler	107
	D. Brauns' Formulation of 1960	109
	E. Adler's Formulation of 1961	111
	F. Freudenberg's Formulation of 1961	113
	G. Freudenberg's Formulation of 1962	114
	H. Freudenberg's Formulation of 1964	117
	I. Freudenberg's Formulation of 1965	120

J. Ludwig, Nist, and McCarthy's Formulation of 1964	123
K. Forss and Fremer's Formulation of 1965	124
L. General Considerations	127
3-4. HARDWOOD LIGNINS	129
REFERENCES	131
<i>Chapter 4</i> The Biosynthesis and Formation of Lignin	136
4-1. THE BIOSYNTHESIS OF LIGNIN MONOMERS	136
4-2. THE CONVERSION OF LIGNIN MONOMERS INTO LIGNIN	146
4-3. CONCLUSIONS	147
REFERENCES	147
<i>Chapter 5</i> The Reactions of Lignin in Major Pulping and Bleaching Processes	149
5-1. THE SULFITE PROCESS	150
A. Inhibitors of Sulfite Pulping	152
B. Mechanism of the Sulfonation Reaction	155
C. Recent Studies of Forss and Fremer	158
D. Continuing Studies	169
5-2. THE SULFATE PROCESS	169
5-3. BLEACHING PROCESSES	175
A. Chlorination	176
B. Oxidative Bleaching	178
C. Reductive Bleaching	181
REFERENCES	182
<i>Chapter 6</i> The Chemical Reactions of Lignin	185
6-1. SULFONATION	185
6-2. HYDROLYSIS	186
A. In Acid or Neutral Solution	186
B. In Alkaline Solution	193
6-3. ALCOHOLYSIS	196

6-4. OXIDATION	198
A. Alkaline Permanganate	199
B. Alkaline Nitrobenzene	202
C. Alkaline Cupric Oxide	205
D. Other Metal Oxides	207
E. Molecular Oxygen	209
6-5. HYDROGENATION AND HYDROGENOLYSIS	210
6-6. OTHER REACTIONS OF LIGNIN	220
A. Nitration	220
B. Gelation of Lignosulfonates	225
C. Reaction with Diazo Compounds	227
D. Demethylation and Degradation Under Pressure	228
E. Other Reactions	230
REFERENCES	231
Chapter 7 The Physical Properties of Lignin and Its Preparations	238
7-1. ULTRAVIOLET ABSORPTION	239
7-2. INFRARED ABSORPTION	242
7-3. PHYSICAL CHARACTERIZATION PROPERTIES	245
7-4. NUCLEAR MAGNETIC RESONANCE	245
7-5. POLAROGRAPHY	247
7-6. ELECTRON PARAMAGNETIC RESONANCE	247
7-7. MOLECULAR WEIGHT	250
7-8. ABSORPTION AND SWELLING	258
REFERENCES	260
Chapter 8 The Biological Decomposition of Lignin	263
REFERENCES	274
Chapter 9 Thermal Decomposition of Lignin	276
REFERENCES	282
Chapter 10 The Linkage of Lignin in the Plant	284
REFERENCES	290

Chapter 11 Utilization of Lignin and Its Preparations	292
11-1. LIGNIN FROM THE SULFITE PROCESS	293
A. Uses Based on Physical Properties	294
B. Uses Based on Chemical Properties	296
C. Lignosulfonates As Raw Materials for Chemical Production	298
11-2. LIGNIN FROM ALKALINE PROCESSES	308
A. Uses for Alkali Lignins Based on Physical Properties	308
B. Uses for Alkali Lignins Based on Chemical Properties	310
C. Alkali Lignin As Raw Material for Chemical Production	311
REFERENCES	313
<i>Author Index</i>	317
<i>Subject Index</i>	329
