ITEM 5	<u>PROPERTIES AND USES</u>
5.1	Basic properties of plywood and blockboard
5.2	Tropical usage of wood-based panel products
5.3	The use of wood-based panel products in India present position and trends
5.4	Competition and substitution between various panel products in major end uses
5.5	Plywood and other wood-based panel products in Japan
5.6	The use of fibreboard in construction, furniture and for industrial purposes
5.7	Market survey- the uses of fibre building boards
5.8	Influence of building codes and by-laws on use of wood-based panel products
5.9	End uses of Douglas fir plywood
5.10	The quality requirements of plywood blockboard and particle board in the British furniture industry
5.11	Properties of wood-based panel products
5.12	Problems related to the use of panel products in construction
5.13	Process developments in medium density fibreboard in Europe
5.14	Proprietes physiques et mecaniques des panneaux de particules en Belgique The physical and mechanical properties of particle board in Belgium
5.15	Behaviour in fire of wood-based panel products
5.16	Minimum quality requirements for wood-based panel products
5.17	The uses and precautions in use of wood wool boards
5.18	Basio properties of wood-wool board
5.19	End use pattern for hardwood plywood in the USA
5.20	Les emplois actuels du contreplaque en France possibilites de developpement futur The Present uses of plywood in France – Possibilities of future development
5.21	Engineered Applications of plywood
5.22	Present use Patterns and Trends in Europe for Particle Board
