

CONTENTS AND SUBJECT INDEX

INTRODUCTION 1

PHENOL-FORMALDEHYDE AND UREA-FORMALDEHYDE BINDERS AND ADHESIVES 3

 Phenol-Formaldehyde, 3

 Alkali- and Acid-Catalyzed Resin 3

 Low pH. Neutralized Phenolic Resins 5

 Two-Stage Reaction Process 8

 Two-Component Phenolic System. 11

 Aqueous Formaldehyde Solution Containing Alkylene Carbonate Hardener. 13

 Barium Hydroxide Catalyzed Mixture of Phenol-Formaldehyde-Melamine 15

 Separate Melamine and Formaldehyde Sprays. 18

 Lignin Sulfonate-Phenol-Formaldehyde 18

 Fluidized Bed Employing Polymerizable Compounds. 21

 Application of Pulverulent Powdered Binders. 25

 Urea-Formaldehyde. 27

 Urea Added in First Stage Prior to Drying. 27

 Stabilized Mixture of Urea-Formaldehyde and Methylolureas. 29

 Prereaction of Urea and Catalyst. 33

 / Halide Salts 34

 / Melamine Reaction Product 38

 Wood Paste with Thermoplastic and Thermoset Resins. 39

POLYURETHANE. AMMONIA AND OTHER BINDING PROCESSES. 41

 Polyurethane. 41

 Isocyanurate Catalysts Used as Mold Release Agents. 41

 Polyisocyanate-Formaldehyde. 43

 Polyisocyanate Adhesive for Acrylic Film Bonding. 45

 / Moisture-Cure Urethane Coating. 47

 / Pine Wood Resin and Organic Isocyanate 48

 Ammonia Process 49

Postheating Technique	49
Zinc Stearate.	51
Ammonium Salts of Weak Acids.	52
Other Processes	54
Maleic Anhydride-Styrene Complex	54
Cationic Latex.	57
Acrylonitrile-Vinyl Acetate Copolymers.	58
Resinous Coal Acid Adhesives.	59
Ketone-Aldehyde Product Modified with an Acyl Hydrazide	60
Thermoplastic Resin	66
Thermoplastic Resin Treatment	68
Simultaneous Defiberization and Starch Cooking	68
GENERAL PROCESSING AND MANUFACTURING TECHNIQUES.	71
Pressing Techniques.	71
Continuous Multistage Press	71
Controlling Pressure in Continuous Machine.	79
Continuous Chain Press.	81
Continuous Presses	85
Multiplaten Finishing Press.	90
Reciprocating Press Using Transition Zone	93
Intermittent Press and Temperature Control.	95
Initial High Compression of Chip Layer	95
Room Temperature, High Pressure Preprocessing Step	96
Heated Platens Arranged in Vertical Plane.	97
Steam Platen.	104
Intermediate Hot Pressing of Preforms	105
Stack Press	109
Heated Press Rollers	111
Heated Drum.	115
Panels Formed Using Profiled Pressure Roller.	118
Screw Press and Extrusion.	126
Bellows Press.	132
Conveyor Systems.	134
Transversely Moving Conveyor	134
Flexible Support.	137
Multiple Conveyor Unit.	140
Endless Conveyor	145
Continuous Belt Process	145
Coating Strip Used as Carrier.	146
Feed Systems and Particle Orientation	151
Continuously and Intermittently Operating Feed Devices.	151
Automatic Control of Disintegrating Machine.	155
Classification of Fibers and Fines from Grinding.	156
Vibrating Table Device	157
Spinning Cone.	157
Particle Size Distribution.	161
Other Processes.	162
Preheating Technique for Particles	162
Conditioning Zone and Two-Stage Curing.	169
Layered Construction	171
Recycle of Excess Material	174
Simultaneous Grinding of Filler and Solid Resin.	177

Orientation of Wood Particles	178
Moisture Control Using Absorbing Material.	179
Remoistened Chipboards.	182
Planing Freshly Pressed Plates While Hot.	183
Fractionated Sawdust Board	188
Sander Dust.	193
Thin Sawdust Boards.	193
✓ Wafers Coated with Wax and Resin.	194
Esterified Tall Oil Surface Treatment	197
High-Frequency Dielectric Heating for Thick Sections	198
Wood Core for Dielectric Heating	200
Adhesive Used Only in Core Portion	200
Adhesive Spray	201
LAMINATION AND DECORATIVE OVERLAYS.	202
Surface Design.	202
Three-Dimensional Facial Design.	202
Relief Texturing	205
Paper Layer.	209
Coloring	210
Variable Colored Surface.	210
Colored Particles.	210
Lamination and Overlay	212
✓ Plastic Film	212
Polyvinyl Chloride.	217
Resin Mat Overlay.	218
Coating Sheets.	222
Flame-Retardant Paper	225
Paper Overlay	226
Fiber-Like Fine Chip Layer.	227
Oriented Wood Fiber Covering Layer	232
Application of Laminae Directed on Mat	233
Low Density Overlays.	241
Surface Treatment.	244
Compression Impregnation	245
Postformable Laminate	246
Green Wood Treated in Alcohol and Resin Solution	247
Prevention of Warpage by Curing on Veneer Sheet	254
SPECIALTY MOLDED PRODUCTS AND OTHER PROCESSES	259
Molded Bodies.	259
Bowling Pins	259
Shaped Envelope Containing Wood Chips and Binder	261
Three Dimensional Molded Articles.	262
Grooved Molded Parts.	263
Molded Articles.	265
Design of Two Section Dies.	266
Foamed Resin Around Composite Core	272
Other Processes	275
Foamed Cement	275
Air Felting Using Cement	276

OTHER FILLERS AND COMPONENTS FOR BOARD MANUFACTURE . . .	277
Bagasse	277
Pith and Fibrous Portions.	277
Pith Coated Boards.	279
Cold Prepress.	281
Sugarcane	283
Flame Retardant Additive.	285
Magnesium Oxide and Wood Shavings.	285
Controlled Addition of Fire Retardant.	287
Other Processes.	291
Rice Hulls	291
Waste Stock from Papermaking Process.	294
Raw Vermiculite.	297
Plant Fiber Residues.	298
Glass Reinforced Elongated Boards.	301
COMPANY INDEX.	309
INVENTOR INDEX	311
U.S. PATENT NUMBER INDEX	313
