

CONTENTS

Introduction	1
<b>Chapter</b>	
1. Printing methods dictate coating formulations	3
2. What coating pigments have in common	15
3. What coating adhesives have in common	22
4. Coating pigments – their use in formulations	35
5. Coating adhesives – their use in formulations	44
6. Coloring materials for coating formulations	57
7. The ABC's of coating additives	65
8. What formulators need to know about color preparation systems	82
9. Colors must be formulated to fit application equipment	93
10. Formulating non – pigmented and low – pigmented opaque coatings	113
11. Multiple coating – the status of the art	124
