1	Introduction	1
1.1	Paper and Board Today	1
	<i>Herbert Holik</i>	
1.2	Overview of the Manufacturing Process for Paper and Board	3
1.3	Historical Background and General Aspects	6
	<i>Peter F. Tschudin</i>	
1.3.1	Introduction	6
1.3.2	Precursors of Paper	7
1.3.2.1	Tapa (Bark-cloth)	7
1.3.2.2	Felt	7
1.3.2.3	Papyrus	7
1.3.3	Paper	8
1.3.3.1	Invention of Paper	8
1.3.3.2	Chinese Paper	8
1.3.3.3	The Eastern Spread of Papermaking	8
1.3.3.4	The Spread of Papermaking into Central and Southern Asia	9
1.3.3.5	Arab Paper	9
1.3.3.6	Medieval European Paper	9
1.3.3.7	Mechanization and Industrialization	10
1.3.3.8	Paper Machines	10
1.3.3.9	Pulping and Sizing	11
1.3.3.10	From Industrialization to Automation and Globalization: Technical and Economic Trends of the 19th and 20th Centuries	12
1.4	Economic Aspects	13
	<i>Gert-Heinz Rentrop</i>	
	References	18
2	Raw Materials for Paper and Board Manufacture	20
2.1	Fibrous Materials	20
2.1.1	Overview	20
	<i>Jürgen Blechschmidt</i>	
2.1.2	Chemical Pulp	21
	<i>Sabine Heinemann</i>	

2.1.3	Mechanical Pulp	22
2.1.4	Recovered Paper, Recycled Fibers	24
	<i>Hans-Joachim Putz</i>	
2.1.4.1	Role of Recovered Paper in the Paper and Board Industry	24
2.1.4.2	Main Definitions for Statistics	25
2.1.4.3	Utilization Rates for Different Paper Grades	27
2.1.4.4	Resources of Recovered Paper	29
2.1.4.5	Lists for Recovered Paper Grades	31
2.1.4.6	Use of Recovered Paper Grades	32
2.2	Non-fiber Raw Material	33
2.2.1	Pigments as Fillers	33
	<i>Maximilian Laufmann</i>	
2.2.1.1	Why Use Fillers?	33
2.2.1.2	Choice of Fillers	35
2.2.1.3	Characterization of Fillers	35
2.2.1.4	Main Mineral Fillers	44
2.2.1.5	Specialty Filler Pigments	52
2.2.1.6	Outlook	54
2.2.2	Coating Pigments	55
	<i>Werner Kogler†, Thoralf Gliese, and Werner J. Auhorn</i>	
2.2.2.1	General Overview	55
2.2.2.2	Main Coating Pigments	57
2.2.2.3	Special Pigments	58
2.2.2.4	Additional Pigments	60
	References	60
3	Chemical Additives	62
	<i>Werner J. Auhorn</i>	
3.1	Introduction	62
3.2	Basic Chemicals	64
3.3	Bleaching Chemicals	65
3.3.1	Bleaching Substances	66
3.3.2	Bleaching Auxiliaries	68
3.4	Starch	68
3.4.1	Products and Market Figures	68
3.4.2	Chemistry, Modification and Conversion Technologies, Properties	70
3.4.3	Starch Application	72
3.5	Aluminum Compounds	73
3.6	Functional Chemicals	73
3.6.1	Coloring Materials (Dyes)	74
3.6.1.1	General	74
3.6.1.2	Classes of Coloring Material	74
3.6.1.3	Dyeing Processes	78
3.6.1.4	Requirements of Colored Paper and Board	80

3.6.2	Optical Brightening Agents (OBA) – Fluorescent Whitening Agents (FWA)	81
3.6.3	Chelating Agents – Complexing Agents	82
3.6.4	Sizing Agents	83
3.6.4.1	Fundamental Aspects of Paper Sizing	83
3.6.4.2	Product Classes	83
3.6.4.3	Application Advice	86
3.6.4.4	Requirements and Measurements of Sized Papers	88
3.6.5	Dry-Strength Resins (DSR)	89
3.6.6	Wet Strength Resins (WSR)	91
3.6.6.1	Melamine-Formaldehyde Resins	92
3.6.6.2	Urea-Formaldehyde Resins	92
3.6.6.3	Epoxidised Polyamide Resins	92
3.6.6.4	Glyoxalated Polyacrylamide Resins	93
3.6.6.5	Other Wet-Strength Resins	94
3.6.7	Additives for Recovered Fiber Processing	94
3.6.7.1	Additives for Repulping	94
3.6.7.2	Additives for Deinking	95
3.6.8	Additives for Specialty Papers	96
3.6.8.1	Photographic Base Paper	96
3.6.8.2	Banknote Papers	97
3.6.8.3	Laminate Papers: Décor Paper, Pre-impregnated Foils	97
3.6.8.4	Filter Papers	97
3.6.8.5	Imitation Parchment (Food Packaging)	98
3.6.8.6	Aquarelle Board	98
3.6.8.7	Carbonless Copying Paper	98
3.6.8.8	Ink-jet Papers	98
3.6.8.9	Fire-resistant Papers	99
3.6.8.10	Anticorrosion Papers	99
3.6.8.11	Abrasive Base Papers	99
3.6.8.12	Papers with Barrier Properties	100
3.6.9	Additives for Paper and Board Coating	101
3.6.9.1	General Aspects	101
3.6.9.2	Market Situation and Future Trends	102
3.6.9.3	Components of Coating Colors	104
3.6.9.4	Color Formulations	126
3.7	Process Chemicals	127
3.7.1	Retention and Drainage Aids (RDA)	127
3.7.1.1	Retention Aids	128
3.7.1.2	Drainage Aids	129
3.7.2	Fixing Agents	130
3.7.3	Additives for Pitch and Deposit Control	132
3.7.4	Slimicides and Biocides	135
3.7.5	Defoamers and Deaerators	137
3.7.6	Cleaning Agents	140

3.7.7	Flocculants and Coagulants for Clarification of Different Water Sources	142
3.7.7.1	Fresh or Raw Water	142
3.7.7.2	Recycled Process Water	143
3.7.7.3	Effluents	143
3.8	General Remarks on the Application of Chemical Additives	144
