677.001 513 BOO

CONTENTS

Chapter 1. Units

1.1 Introduction 1
1.2 Definitions of basic units 2
1.3 Definitions of some derived units 5
1.4 Multiples and sub – multiples of SI units 6
1.5 Conversion of units from one system to another 8
1.6 The use of conversion tables 12
Exercises 13
Suggested further reading 14

Chapter 2. Revision of basic mathematics

2.1Introduction 15
2.2 Accuracy and error 15
2.3 Approximate values , decimal places , and significant figures 16
2.4 Checking answers 19
2.5 The use of logarithms in calculation 20
2.6 Symbols and formulae 25
2.7 Areas and perimeters 30
2.8 Volumes and surface areas 42
2.9 Ratio 48
2.10 Proportion 49
2.11 Percentages 52
2.12 Elements of trigonometry 56
2.13 Averages 62
2.14 Dispersion or scatter 66
Exercises 71
Suggested further reading 75

Chapter 3. Graphs and other forms of graphical representation

3.1 Introduction 76
3.2 Axes of reference 76
3.3 Scales 77
3.4 Co – ordinates 77
3.5 Plotting a graph 78
3.6 The law of graphs 85
3.7 The interpretation of the gradient of a graph 87
3.8 Graphs showing minimum and maximum values 94
3.9 Reduction of Non – linear laws to the linear form 97

677.001 513 BOO V.2

CONTENTS

Chapter 5 : Elements of mechanisms

5.1 Introduction 163
5.2 Basic kinematics 163
5.3 The equations of motion 171
5.4 Motion in a circle 173
5.6 Chain – and – sprocket drive 186
5.7 Driving by gears 187
5.8 Intermittent rotary motion 227
5.9 Cams 233
5.10 The eccentric 246
Exercises 258
Suggested further reading 260

Chapter 6 : Yarns

6.1 Opening and cleaning 261
6.2 Drafting 274
6.3 Calculations on the card mechanism 275
6.4 The drawframe 291
6.5 Draft in combing machines 303
6.6 The speedframe 311
6.7 Yarn dimensions 321
6.8 Twist in yarn 334
6.9 Irregularity 339
6.10 The ring – spinning frame 350
Exercises 369
Suggested further reading 370

Answers to exercises 373
Index 374

3.10 The type of law $y = ax^n$ 102
3.11 The type of law $y = ae^{bx}$ 106
3.12 Graphical presentation of data 112
3.13 Vectors 117
3.14 Nomograms 122
Exercises 124
Suggested further reading 125
Chapter 4. Fibres
4.1 Introduction 126
4.2 Fibre dimensions 126
4.3 Tensile strength 146
4.4 Work of rupture 147
4.5 Trash and lint content of cotton 148
4.6 Oils , fats , waxes, sizes , and resins in fibre samples 152
4.7 Quantitative analysis of fibre mixtures 154
Exercises 156
Suggested further reading 157
Answers to exercises 158
Index 16

677.001 513 BOO V.3

CONTENTS

Chapter 7 : Yarn preparation

7.1 Introduction 377
7.2 Winding rate 377
7.3 Wind and traverse ratio 384
7.4 Cone – winding 390
7.5 Yarn tension and tension devices 397
7.6 Yarn – clearing and clearing devices 401
7.7 Warp preparation 410
7.8 Sizing 418
7.9 Weft preparation 429
Exercises 442
Suggested further reading 443

Chapter 8 : Fabrics

8.1 Woven – fabric structure 445
8.2 Weaving mechanisms 458
8.3 The geometry of plain weft – knitted fabrics 487
8.4 The geometry of warp – knitted fabrics 499
8.5 Knitting mechanisms 505
Exercises 508
Suggested further reading 509

Answers to exercises 512
