1	Introduction Y. WANG, Georgia Institute of Technology, USA	1
Part I General textile recycling issues and technology		
2	Textile recycling: a system perspective J. M. HAWLEY, University of Missouri, USA	7
2.1	Introduction	7
2.2	Systems theory	8
2.3	Understanding the textile and apparel recycling process	8
2.4	Textile recycling companies	10
2.5	The sorting process	12
2.6	The pyramid model	13
2.7	Textile recycling constituents	18
2.8	Discussion and future trends	22
2.9	References	23
3	Designing textile products that are easy to recycle B. GULICH, Saxon Textile Research Institute, Germany	25
3.1	History	25
3.2	Product responsibility	26
3.3	Current situation in Germany	26
3.4	Basic methods	27
3.5	Examples	29
3.6	Conclusions	36
3.7	References	36

4	Carpet stewardship in the United States – a commitment to sustainability	38
	R. PEOPLES, The Carpet and Rug Institute and Carpet America Recovery Effort. USA	
4.1	Introduction	38
4.2	Carpet industry environmental stewardship	39
4.3	Carpet recycling – early efforts	40
4.4	The Carpet America Recovery Effort	41
4.5	Creating a new industry – material flows	42
4.6	The role of non-carpet products in carpet recycling	44
4.7	Conclusions	44
4.8	Future trends in the USA	45
5	Systems planning for carpet recycling	46
	M. REALFF, Georgia Institute of Technology, USA	
5.1	Introduction	46
5.2	The need for strategic systems planning	46
5.3	Previous system issues	47
5.4	The estimation of carpet recycling volumes	49
5.5	Initial collection schemes	50
5.6	The alternative structures for consolidating and sorting of carpet	52
5.7	Case studies	55
5.8	Discussion	55
5.9	Conclusions and future trends	56
5.10	References	57
6	Carpet recycling technologies	58
	Y. WANG, Georgia Institute of Technology, USA	
6.1	Introduction	58
6.2	Fiber identification and sorting	60
6.3	Size reduction	61
6.4	Mechanical separation of carpet components	61
6.5	Solvent extraction of nylon from carpet	62
6.6	Depolymerization of nylon	63
6.7	Melt processing	64
6.8	Use of waste fibers as reinforcement in polymer composites	65
6.9	Waste to energy conversion	66
6.10	Conclusions	67
6.11	References	67

Part II Chemical aspects in textile recycling

7	Recycling waste water from textile production	73
	R. SCHNEIDER, Institute for Textile Chemistry and Chemical Fibres. Germany	
7.1	Introduction	73
7.2	System analysis	73
7.3	Optimization of processes for water recycling	77
7.4	Direct re-use of waste water	83
7.5	Waste water treatments and water recycling with membrane technology	85
7.6	Re-use of reclaimed/recycled water	88
7.7	Future trends	90
7.8	Sources of further information	91
7.9	References	92
8	Recycling and re-use of textile chemicals	95
	G. BUSCHLE-DILLER, Auburn University, USA	
8.1	Introduction	95
8.2	Fabric preparation processes	97
8.3	Dyeing and printing processes	101
8.4	Recycling of finishing compounds	107
8.5	Waste minimization at source	108
8.6	Conclusions	110
8.7	References	110

Part III Recycled textile products

9	Development of products made of reclaimed fibres	117
	B. GULICH, Saxon Textile Research Institute, Germany	
9.1	Reclaimed fibres as raw materials	117
9.2	Characteristics of reclaimed fibres	118
9.3	Products and markets	119
9.4	Examples developed by the STFI	125
9.5	Other examples	133
9.6	Future trends	135
9.7	References	136

10	Manufacturing nonwovens and other products using recycled fibers containing spandex	137
	K. D. LANGLEY and Y. K. KIM, University of Massachusetts Dartmouth, USA	
10.1	Introduction	137
10.2	Spandex	137
10.3	Review of recycling	141
10.4	Evaluation and characterization of the remnant material	142
10.5	Fiber separation trial at recycling plant	143
10.6	Laboratory-scale processing of the recycled material	143
10.7	Chemical treatment of the raw material	145
10.8	Mechanical processing of the chemically treated samples	146
10.9	Types of nonwovens	148
10.10	Markets for needle-punched fabrics	149
10.11	Experiments in production of nonwoven samples	152
10.12	Flocking study	154
10.13	Oil absorption with fibrous waste	160
10.14	Conclusions	161
10.15	Acknowledgments	162
10.16	References	162
11	Textile products produced from alternative fibers	165
	B. R. GEORGE, A. BOCKARIE and H. MCBRIDE, Philadelphia University, USA, A. EVAZYNAJAD, Gudebrod Inc., USA, N. BIEAK, Auburn University, USA	
11.1	Introduction	165
11.2	Experimental procedures	168
11.3	Results and discussion	172
11.4	Conclusions	178
11.5	References	178
Part IV Applications of recycled textiles		
12	Recycling of textiles used in the operating theatre	183
	M. J. ABREU and M. E. SILVA, University of Minho, Portugal, L. SCHACHER and D. ADOLPHE, Ecole Nationale Supérieure des Industries Textiles de Mulhouse, France	
12.1	Introduction	183
12.2	Directives	184
12.3	Standards	184

12.4	Products	185
12.5	Materials	187
12.6	Properties required	189
12.7	Market	193
12.8	Environmental aspects	195
12.9	Waste management	197
12.10	Future trends	200
12.11	Conclusions	200
12.12	References	201
12.13	Further reading	202
13	Composite products from post-consumer carpet	203
	J. MUZZY, Georgia Institute of Technology, USA	
13.1	Introduction	203
13.2	Separating carpet	203
13.3	Composites from sorted carpet	204
13.4	Wood fiber reinforced composites	207
13.5	Products from reinforced post-consumer carpet	209
13.6	Conclusions	212
13.7	Acknowledgements	212
13.8	References	212
14	Utilization of recycled carpet waste fibers for reinforcement of concrete and soil	213
	Y. WANG, Georgia Institute of Technology. USA	
14.1	Introduction	213
14.2	Fiber reinforced concrete	214
14.3	Recycled fiber reinforced concrete	214
14.4	Fiber reinforced soil	218
14.5	Recycled fiber reinforced soil	220
14.6	Conclusions	222
14.7	References	223
