<b>1 Review of yarn production .....</b>	<b>1</b>
1.1 Historical basis .....	1
1.2 Present day conditions .....	8
1.3 Future of the means of textile production .....	9
1.4 Modern production systems .....	10
References .....	17
<b>2 Textile products and fiber production .....</b>	<b>18</b>
2.1 Textile materials (fabrics, fibers, and filaments) .....	18
2.2 Natural fibers (types and production) .....	22
2.3 Man-made fibers (polymer extrusion and yarn production) .....	38
References .....	54
<b>3 Common principles .....</b>	<b>56</b>
3.1 Introduction .....	56
3.2 Twist in strands .....	56
3.3 Twist insertion .....	61
3.4 Confined and non-confined systems .....	67
3.5 Twist evenness .....	68
3.6 Tension control .....	69
3.7 Drawing .....	70
3.8 Consequences of roller errors on the textile product .....	76
3.9 Control of irregular flow in drawing or drafting .....	77
3.10 Doubling .....	83
3.11 Effects of shear .....	84
3.12 Integration of sub-processes .....	86
References .....	87
<b>4 Filament yarn production .....</b>	<b>88</b>
4.1 Introduction .....	88
4.2 Texturing filament yarns .....	89

4.3	Real twist texturing .....	90
4.4	False twist texturing .....	92
4.5	Draw-texturing .....	102
4.6	Stuffer box texturing .....	104
4.7	Air-jet texturing .....	106
4.8	Other texturing techniques .....	110
4.9	Industrial filaments .....	113
4.10	Silk filaments and staple yarns .....	113
4.11	Morphology and dyeing .....	114
	References .....	114
<b>5</b>	<b>Carding and prior processes for short-staple fibers .....</b>	<b>116</b>
5.1	Introduction .....	116
5.2	Opening line .....	118
5.3	Bale preparation .....	119
5.4	The first stage of blending and opening .....	121
5.5	The process of disintegration of fiber clumps .....	122
5.6	Condensation .....	123
5.7	The process of cleaning .....	125
5.8	Intimate blending .....	129
5.9	Fiber flow .....	133
5.10	Carding .....	136
5.11	Waste control .....	149
5.12	Safety .....	153
	References .....	154
<b>6</b>	<b>Sliver preparation .....</b>	<b>155</b>
6.1	Introduction .....	155
6.2	Drawframe .....	155
6.3	Combing .....	159
6.4	Creel blending .....	164
6.5	An industrial case study .....	165
	References .....	167
<b>7</b>	<b>Short-staple spinning .....</b>	<b>168</b>
7.1	Ring spinning .....	168
7.2	Open-end spinning .....	185
	References .....	203
<b>8</b>	<b>Long-staple spinning .....</b>	<b>205</b>
8.1	Introduction: Effects of lengthening the staple .....	205
8.2	Wool fibers and their preparation .....	206
8.3	Worsted systems .....	213
8.4	The woolen system .....	220
8.5	Bast fiber spinning processes .....	23I
	References .....	232

<b>9 Post-spinning processes .....</b>	<b>234</b>
9.1 Winding .....	234
9.2 Yarn joining .....	245
9.3 Ply yarns .....	250
9.4 Automation .....	253
9.5 Two-for-one twisting .....	255
9.6 Customer concerns .....	257
References .....	259
<b>10 Staple systems and modified yarn structures .....</b>	<b>260</b>
10.1 Yarns of complex structure .....	260
10.2 Processes using modified twist .....	261
10.3 Compact spinning .....	261
10.4 Air-jet spinning .....	263
10.5 Sirospun yarns and process .....	268
10.6 Hollow spindle spinning .....	270
10.7 Self-twist spinning .....	271
10.8 Twisted self-twist yarns and processes .....	274
References .....	275
<b>11 Quality and quality control .....</b>	<b>276</b>
11.1 Quality .....	276
11.2 Quality control .....	278
11.3 Yarn evenness .....	291
11.4 End-breaks and quality .....	298
References .....	300
<b>12 Economics of staple yarn production .....</b>	<b>301</b>
12.1 Yarn economics .....	301
12.2 Productivity .....	303
12.3 Quality and economics .....	306
12.4 Cost minimization .....	308
12.5 Operational factors .....	313
12.6 International competition .....	315
References .....	316
<b>Appendices .....</b>	<b>317</b>
1. Calculations I: Elementary theory .....	317
2. Calculations II: Worked examples .....	329
3. Advanced topics I: Air conditioning and utilities .....	341
4. Advanced topics II: Testing of textile materials .....	350
5. Advanced topics III: Staple yarn structures .....	373
6. Advanced topics IV: Textured yarn structures .....	383
7. Advanced topics V: Blending of staple fibers.....	389
8. Advanced topics VI: Drafting and doubling .....	407
9. Advanced topics VII: Yarn balloon mechanics .....	427
10. Advanced topics VIII: Topics in rotor spinning .....	453
<b>Index .....</b>	<b>465</b>
