

CONTENTS

1. Elemental analysis detection , identification , and quantitative determination of metals and nonmetallic elements	1
2. Infrared spectroscopy and physical properties of cellulose	59
3. Light microscopy in the study of cellulose	93
4. Electron microscopy of cellulose and cellulose derivatives	171
5. Instrumental methods in the study of oxidation degradation , and pyrolysis of cellulose	273
6. X – Ray diffraction	339
7. Wide – dine nuclear magnetic resonance spectroscopy	379
8. Infrared spectra of chemically modified cotton cellulose	402
Author index	463
Subject index	483
