	<i>Contributor contact details</i>	<i>xi</i>
	<i>Introduction</i>	<i>xv</i>
Part I The structure and properties of cotton		
1	Chemical structure and properties of cotton	3
	Y-L HSIEH, University of California, USA	
1.1	Introduction	3
1.2	Chemistry	3
1.3	Fiber development	7
1.4	Fiber strength	17
1.5	Conclusion	29
1.6	Acknowledgements	30
1.7	References and further reading	30
2	Physical structure and properties of cotton	35
	J W S HEARLE, University of Manchester, UK	
2.1	Introduction	35
2.2	Cotton morphology	35
2.3	Moisture absorption	40
2.4	Mechanical properties	46
2.5	Other physical properties	57
2.6	Sources of further information	62
2.7	Future trends	63
2.8	References	63
3	Cotton fibre quality	68
	S GORDON, CSIRO Textile and Fibre Technology, Australia	
3.1	Introduction	68
3.2	Length properties	70
3.3	Transverse properties	77

3.4	Tensile properties	81
3.5	Colour	84
3.6	Impurities in cotton	85
3.7	Moisture	92
3.8	Wax content	92
3.9	Microbial attack	94
3.10	Future trends	94
3.11	Sources of further information	95
3.12	References	95

Part II Production processes for cotton

4	The genetic modification of cotton	103
	S ORFORD, S DELANEY and J TIMMIS, The University of Adelaide, Australia	
4.1	Introduction	103
4.2	Advantages and limitations of conventional plant breeding	104
4.3	The molecular genetics of cotton	107
4.4	Genetic transformation of cotton	110
4.5	Genetic engineering in cotton	113
4.6	Recent experiments and future targets for genetic manipulation of cotton	116
4.7	Potential impacts of GM crops	119
4.8	Conclusions	122
4.9	Sources of further information	122
4.10	References	123
5	Organic cotton	130
	PJ WAKELYN, National Cotton Council, USA and M R CHAUDHRY, International Cotton Advisory Committee, USA	
5.1	Introduction	130
5.2	World organic cotton production	131
5.3	Why organic cotton?	133
5.4	Production of organic cotton and how it varies from conventional cotton production	139
5.5	Post-harvest handling/processing of organic cotton	149
5.6	Limitations to organic production	154
5.7	Methods to improve organic cotton production	157
5.8	Certification	158
5.9	Naturally colored organic cotton	163
5.10	Conclusions	164
5.11	References	165
	Appendix 5.1	171
	Appendix 5.2	174

6	The harvesting and ginning of cotton	176
	W S ANTHONY, formerly United States Department of Agriculture, USA	
6.1	Introduction	176
6.2	Harvesting	178
6.3	Seed ,cotton storage	181
6.4	Gin machinery	183
6.5	Effect of gin machinery on cotton quality	196
6.6	Summary	198
6.7	Future trends	200
6.8	References	201
7	The opening, blending, cleaning and carding of cotton	203
	C LAWRENCE, University of Leeds. UK	
7.1	Introduction	203
7.2	Stage 1: pre-opening\pre-mixing	206
7.3	Stage 2: heavy particle detection and extraction	207
7.4	Stage 3: carding	217
7.5	Silver quality and quality control	225
7.6	References	238
8	Cotton spinning technology	240
	L HUNTER, CSIR and Nelson Mandela Metropolitan University. South Africa	
8.1	Introduction	240
8.2	Preparation for spinning	242
8.3	Combing	249
8.4	Roving	251
8.5	Spinning	253
8.6	Spinning limits and yarn irregularity	269
8.7	Yarn twisting (folding)	270
8.8	Winding, clearing and lubrication	271
8.9	Yarn steaming (setting)	272
8.10	Conclusions	272
8.11	References	272
9	Cotton knitting technology	275
	N UÇAR, Istanbul Technical University. Turkey	
9.1	The development of knitting technology	275
9.2	Terms used in knitting technology	276
9.3	Classification of knitting technology	284
9.4	Weft knitting technology	285
9.5	Warp knitting technology	302

viii Contents

9.6	Faults in knitted fabrics	316
9.7	Physical and mechanical properties of knitted fabrics	318
9.8	Production calculation	323
9.9	Conclusions	325
9.10	References	325
10	Cotton weaving technology	328
	I DORAISWAMY and A BASU, The South India Textile Research Association, India	
10.1	Introduction	328
10.2	Preparatory processes for weaving	329
10.3	Weaving process	332
10.4	Woven fabric	340
10.5	Modern weaving machines	342
10.6	Looms installed and weaving costs in selected countries	349
10.7	Future of weaving	350
10.8	Sources of further information	351
11	Dyeing cotton and cotton products	353
	D KING, CSIRO Textile and Fibre Technology, Australia	
11.1	Introduction	353
11.2	General principles	353
11.3	Direct dyes	357
11.4	Reactive dyes	358
11.5	Vat, sulphur and azoic dyes	359
11.6	Exhaust dyeing of cotton	364
11.7	Semi-continuous dyeing	367
11.8	Continuous dyeing of cotton fabrics	368
11.9	Printing of cotton fabrics	369
11.10	Environmental aspects of dyeing cotton	372
11.11	Future trends	373
11.12	Sources of further information	376
11.13	References	376
Part III Quality and other issues		
12	Testing cotton yarns and fabrics	381
	L HUNTER, CSIR and Nelson Mandela Metropolitan University, South Africa	
12.1	Introduction	381
12.2	Yarn testing	382
12.3	Fabric testing	398
12.4	Colourfastness	411

12.5	Weathering test	414
12.6	Dimensional stability	414
12.7	Abrasion resistance	415
12.8	Fabric strength	418
12.9	Miscellaneous tests	419
12.10	General	421
12.11	Conclusions	421
12.12	References	422
13	Controlling costs in cotton production	425
	T TOWNSEND, International Cotton Advisory Committee, USA	
13.1	Introduction	425
13.2	The economic importance of cotton	425
13.3	Production	426
13.4	Consumption	434
13.5	Trade	441
13.6	Government measures	449
13.7	Prices	452
13.8	Future trends	453
13.9	Sources of further information	454
13.10	References	455
	Appendix	456
14	Health and safety issues in cotton production and processing	460
	P J WAKELYN, National Cotton Council, USA	
14.1	Introduction	460
14.2	Cotton production	462
14.3	Harvesting and ginning	466
14.4	Yarn and fabric manufacturing	467
14.5	Wet processing (preparation, dyeing and finishing)	470
14.6	Consumers	479
14.7	Future trends	479
14.8	References	479
15	Recycling of cotton	484
	B J COLLIER, J R COLLIER, Florida State University, USA, S PETROVAN University of Tennessee, USA and I I NEGULESCU, Louisiana State University	
15.1	Introduction	484
15.2	Textile life cycle and waste treatment choices	484
15.3	Cotton sources	487
15.4	Mechanical reprocessing	489

x	Contents	
15.5	Chemical recycling	490
15.6	Future trends	496
15.7	Sources of further information	498
15.8	References	498
16	Nonwoven technology for cotton	501
	G BHAT, University of Tennessee, USA	
16.1	Nonwovens	501
16.2	Production of nonwovens	503
16.3	Fibers used in nonwovens	512
16.4	Finishing and treatment of cotton nonwovens	523
16.5	Future trends	524
16.6	Conclusions	525
16.7	References	526
	Index	528
