

CONTENTS

Part 1 The structure and properties of fibres

1. Fundamental conceptions	3
2. The structure of fibres	20
3. The synthesis of fibres	49
4. Orientation and crystallinity	66
5. The influence of orientation on fibre properties	95
6. Stereoregular fibrous polymers	105
7. Chemical constitution and fibre properties	122

part 2 Fibres made from natural polymers

8. The first rayons : Chardonnat silk	147
9. Viscose rayon	152
10. Cuprammonium rayon	213
11. Cellulose acetate	221
12. Cellulose triacetate : tricel arnel	241
13. High – tenacity cellulosic fibres : tenasco cordura durafil fortisan	252
14. Polynosic modified cellulosic fibres	278
15. Chemically modified cellulosic fibres	278
16. Alginate fibres	288
17. Casein fibres : Lanital aralac, fibrolane , merinova	295
18. Ardil vicara soybean	306

Part 3 synthetic fibres

19. Nylon	317
20. Nylon 6, nylon 7, nylon 11: perlon, caprolan kapron enant rilsan	354
21. Aromatic polyamides : nylon 6-T nomex	380
22. Polyureas	396
23. Polyesters : terylene dacron kodel vycron	400
24. Snap – back fibres : lycra vyrene spanzelle	440
25. Vinyon and vinyon HH	449
26. Dynel	456
27. Saran velon permalon tygan	467
28. Polyvinyl chloride : Pe Ce PCU Rhovyl	473
29. Vinyon and kuralon	484
30. Verel , teklan	490
31. Orlon, pan dralon	496
32. Acrilan and courtelle	522
33. Cresian	535

34. Zefran	538
35. Darvan or travis	540
36. Polyethylene : courlene marlex	547
37. Polyethylene : meraklon ulstron	554
38. Teflon	568
39. Glass	574
40. Carbon fibres hyfil thornel	584
41. Metallic yarns	600
42. Fibres of the future	606

Part 4. Processing

43. The control of static	625
44. Textured yarns	629
45. Staple fibre	644
46. Non – woven fabrics felts and papers	682
47. Dyeing and finishing	698
48. Identification and estimation of man – made fibres	817
49. Economic and social aspects of man – made fibres	835
List of commercial man – made fibres	887
Bibliography	907
Index	909
