

CONTENTS

Part 1. The structure and properties of fibres

1. Fundamental conceptions	3
2. The structure of fibres	25
3. The synthesis of fibres	55
4. Orientation and crystallinity	73
5. The influence of orientation on fibre properties	102
6. Stereoregular fibrous polymers	112
7. Chemical constitution and fibre properties	129

Part 2. Fibres made from natural polymers

8. The first rayons : chardonnet silk	157
9. Viscose rayon	162
10. Cuprammonium rayon	224
11. Cellulose acetate	232
12. Cellulose triacetate : tricel , arnel	252
13. High – tenacity cellulosic fibres : tenasco , cordura, durafil , fortisan	263
14. Polynosic rayons : vincel zantrel	279
15. Chemically modified cellulosic fibres	290
16. Alginate fibres	300
17. Casein fibres : lanital , Aralac , fibrolane , merinova,	307
18. Ardil , vicara , soybean	318

Part 3. Synthetic fibres

19. Nylon	333
20. Nylon 6, nylon 7, nylon 11, perlon , caprolan , kapron , enant, rilsan	376
21. Aromatic polyamides : nylon 6-T nomex	408
22. Qiana	425
23. Polyureas	430
24. Polyesters : terylene, dacron, kodel , vycron	434
25. Polyesterethers : A – Tell	482
26. Snap – back fibres : lycra, vyrene, spanzelle	486
27. Vinyon and vinyon HH	496
28. Dynel	504
29. Saran : velon , permalon, tygan	515
30. Polyvinyl chloride : PE CE , PCU, rhovyl	521
31. Vinyon and kuralon	533
32. Verel teklan	540
33. Orlon, pan, dralon	547

34. Acrilan and courtelle	574
35. Creslan	588
36. Zefran	591
37. Darvan or travis	594
38. Polyethylene : courlene, marlex	601
39. Polypropylene : meraklon , ulstron	609
40. Teflon	628
41. Glass	634
42. Carbon fibres: hyfil , thornel , grafil modmor	645
43. Metallic yarns	670
44. Fibres of the future	677
Part 4. Processing	
45. The control of static	705
46. Textured yarns	711
47. Staple fibre	732
48. Non – woven fabrics , felts and papers	711
49. Dyeing and finishing	804
50. Identification and estimation of man – made fibres	952
51. Economic and social aspects of man – made fibres	971
List of commercial man – made fibres	1043
Bibliography	1065
Index	1067
