

CONTENTS

1. history of the development of polyester fibres	3
2. Fundamentals and diagrams showing the procedure to be observed in the production of polyester fibres	11
3. Raw materials	45
4. Chemistry and technology of polycondensation	87
5. melt spinning of polyesters	141
6. Drawing of polyester filaments and the appropriate drawing machinery	223
7. Setting of drawn polyester filaments	275
8. Twist doubling winding and warping of continuous polyester filaments	305
9. Crimping cutting drying sorting and packaging of continuous polyester of polyester waste	323
10. Preparation of polyester waste	353
11. Characteristics and end uses of polyester filaments	367
12. Processing and end uses of polyester filaments	415
Subject index	453
