

CONTENTS

INTRODUCTION

POLYAMIDES	2
Polyamide Raw Materials	4
Adipic Acid	4
Adipic Acid - Cyclohexane Oxidation	4
Adipic Acid Production	13
Hexamethylene Diamine	25
Adiponitrile	30
Adiponitrile from Adipic Acid	33
Adiponitrile from Acrylonitrile	41
Caprolactam	44
Caprolactam from Cyclohexanone Oxime	45
Caprolactam from Hexahydrobenzoic Acid	54
Lauro lactam	60
Aromatic Diamines	62
Aromatic Diamines - Dinitrile Intermediate Manufacture	62
Aromatic Diamines from Dinitrile Intermediates	67
Aromatic Dicarboxylic Acids	70
Polyamide Intermediates	71
Nylon Salt	71
Polyamide Polymerization Processes	73
For Nylon-6	73
For Nylon-66	80
Polyamide Fiber Forming Processes	100
Wet Spinning	100
Melt Spinning	106
POLYESTERS	124
Polyester Raw Materials	125
Terephthalic Acid from Xylene	125
Terephthalic Acid from Toluene	148
DMT Production directly from Xylenes	159
DMT from Terephthalic Acid	160
Ethylene Glycol	168

CONTENTS - Continued

Ethylene Oxide	171
1,4-Cyclohexane Dimethanol	178
Dihydric Phenols	178
Polyester Intermediates	179
Bis-2-Hydroxyethyl Terephthalate	179
• Polyester Polymerization Processes	185
Polyethylene Terephthalate Manufacture	185
• Polyester Fiber Forming Processes	205
Melt Spinning	205
 ACRYLICS	 217
Acrylic Fiber Raw Materials	218
Acrylonitrile	218
Acrylic Polymerization Processes	225
Polyacrylonitrile	225
Acrylic Fiber Forming Processes	228
Wet Spinning	229
Dry Spinning	246
Melt Spinning	246
 POLYOLEFINS	 249
Polyolefin Raw Materials	250
Ethylene	250
Propylene	251
Higher Olefins	251
Polyolefin Polymerization Processes	253
Polypropylene	253
Polyolefin Fiber Forming Processes	259
Wet Spinning	260
Dry Spinning	263
Melt Spinning	267
Fibrillation of Plastic Films	271
 FUTURE TRENDS	 275
