

CONTENTS

|                                  |     |
|----------------------------------|-----|
| 1. Introduction                  | 1   |
| 2. Raw materials – polymer       | 11  |
| 3. The polymer in spinning       | 77  |
| 4. Fiber structure               | 123 |
| 5. Engineering problems          | 151 |
| 6. Analysis of process variables | 204 |
| 7. Spinning from solution        | 235 |
| 8. Fiber properties              | 258 |
| 9. Process scale – up            | 293 |
| 10. Practical applications       | 302 |
| Name index                       | 321 |
| Subject index                    | 331 |
