

CONTENTS

1-1 An introduction to polymer chemistry	1
1-2 Colloid chemistry fundamentals of latexes	7
1-3. Acrylic polymers	19
1-4 Coloring nonwovens : where we're going	25
2-1 Flurochemicals – unique additives for nonwoven substrates	29
2-2 Waterborne epoxy resins	35
2-3 Binder quality – measurement , maintenance , and effect on the end user	43
3-1 Chemical bonding of nonwoven webs	49
3-2 Functionalized styrene – butadiene latexes for nonwovens	55
3-3 Reducing formaldehyde emissions from nonwovens	63
4-1 Enhancing the value of nonwoven fabrics with surface bonded cationic antimicrobials	73
4-2 Polyvinyl chloride latexes and nitrile latexes for high loft nonwoven binders	77
4-3 Flame retardants for nonwovens	83
Conversion factors for SI Units	91
