

CONTENTS

1. An introduction to fibre structure	1
2. Sampling for the determination of fibre properties	74
3. Fibre length	87
4. Fibre – length measurement	102
5. Transverse dimensions	124
6. Fibre density	154
7. Equilibrium absorption of water	159
8. Heats of sorption	178
9. Rate of absorption of moisture	186
10. The retention of liquid water	215
11. Swelling	223
12. Theories of moisture sorption	229
13. Tensile properties	265
14. The effects of variability	306
15. Elastic recovery	322
16. Time effects	341
17. Forces in various directions	399
18. Theories of mechanical properties	441
19. Dielectric properties	481
20. Electrical resistance	502
21. Static electricity	529
22. Optical properties	564
23. Thermal properties and setting	585
24. Fibre friction	611
Appendix	642
Name index	645
Subject index	653
