

CONTENTS

Complete Fully Automatic Production Line

Basic Introduction to Microwaves, and the Points to Look for in Microwave Continuous
Vulcanisation Lines

Advanced Control Systems for Extruders and Extrusion Lines: Requirements for Automation
and Host Computer

The Evolution of Screw Design for Rubber Extruders Leading up to Current Automated Applications
Developments at Rapra with the CTM

A New Variable Speed Forced Roller for Elastomer Extruders

Computer Aided Engineering in the Production and Design of Elastomer Profile

Computer Aided Die Design

Extrusion Quality Control through Computer Vision Technology

Practical Applications of the Short Adjustable MCT Cold Feed Extruder
