

CONTENTS

I. Introduction	1/1
II. Blending of Particles	2/1
A. The Statistical Description of Mixing	2/2
B. Definition of Mixedness	2/17
C. The Kinetics of Simple Mixing	2/21
D. Multicomponent Mixtures & Markov Chains	2/30
E. Mixing Equipment	2/37
F. Summary	2/53
Literature Cited	2/54
III. Laminar & Dispersive Mixing	3/1
A. Laminar Shear Mixing	3/2
B. Dispersive Mixing	3/15
C. Masterbatches	3/31
D. Incorporation of Carbon Black	3/35
E. Summary	3/39
Literature Cited	3/40
IV. The Milling of Rubbers	4/1
A. The Analysis of a Calendar	4/4
B. Processing Instabilities	4/29
C. Heat Transfer	4/39
D. Scale-up Alternatives	4/43
E. Commercial Mills	4/51
F. Summary	4/53
Literature Cited	4/54
V. Internal Mixers	5/1
A. Flow in as Internal Mixer	5/2
B. Analysis of as Internal Mixer	5/10
C. Alternative Mixer Models	5/20
D. Heat Transfer in Internal Mixers	5/30
E. The Effect of Ram Pressure	5/36
F. Commercial Internal Mixers	5/42
G. Scaling Laws and Dump Criteria	5/49
H. Summary	5/77
Literature Cited	5/78

VI. Continuous Mixers	6/1
A. Mixing in Single-Screw Extruders	6/2
B. Mixing in Two-Screw Extruders	6/22
C. Summary	6/24
Literature Cited	6/25
VII. Powdered Rubbers	7/1
A. Preparation	7/2
B. Mixing Powdered Rubbers	7/4
C. The Influence of Particle Morphology	7/6
D. Evaluation of Powdered Rubber	7/8
Literature Cited	7/12
