

CONTENTS

1. Introduction	3
1.1 Products	3
1.2 Compound Design	3
1.3 Selection of the Basic Rubber	3
1.4 The Primary Functions of Rubber Compounding Ingredients	3
1.5 Cost Over Density Relationships in Compounding	3
1.6 Processing and Rubber Compounding	3
1.7 Vulcanisate Specifications and Compounding	11
2. Vulcanisation and Acceleration	11
2.1 Sulphur Vulcanisation and Acceleration	11
2.2 Peroxide or Free Radical Vulcanisation Systems	37
3. Antidegradants	42
3.1 Ozone Attack	42
3.2 Novel Triazine Antidegradants	53
3.3 Controlled Release Antioxidants	53
4. Reinforcing Fillers for Rubber	54
4.1 Strain Crystallisation in Rubbers	54
4.2 The Interaction of Strain Crystallisation and Filler Particles in a Rubber	54
4.3 Tear Strength and Filler Reinforcement	54
4.4 Stress Softening or Mullins Effect	54
4.5 Reinforcing Fillers	58
4.6 Filler Structure	59
4.7 Chemical Functionality of Rubber Surfaces	65
4.8 Non-Black and Mineral Fillers	65
4.9 Natural Silicates	65
Appendix 1	69
Glossary of Abbreviations used in the Review: Rubbers	69
Appendix 2	69
Glossary of Abbreviations used in the Review: Compounding Ingredients	69
