

CONTENTS

1. Network Theories of Reinforcement	1
2. Mechanism of Tearing and Abrasion of Reinforced Elastomers	23
3. Dynamic Properties of Filler-Loaded Rubbers	69
4. Interactions between Elastomers and Reinforcing Fillers	125
5. The Nature of Polymer – Filler Attachments	153
6. Microscopy in the Study of Elastomer Reinforcement by Pigment Fillers	187
7. Rheological Behavior of Filler-Reinforced Compounds	225
8. Chemical Interaction of Fillers and Rubbers During Cold Milling	247
9. Promoters of Fillers Reinforcement	261
10. Commercial Manufacture of Carbon Black	287
11. Latex Masterbatching	307
12. Compounding with Carbon Black	319
13. Reinforcing Fine Particle Silicas and Silicates	405
14. Properties of White Reinforcing Fillers in Elastomers	425
15. Reinforcement of Rubber by Organic Fillers	491
16. Reinforcement of Polyethylene by Carbon Black	529
17. Antioxidant Properties of Carbon Black	563
