

CONTENTS

1. The Technology of Vulcanization	
1.1 Vulcanization	3
1.2 Vulcanization Methods	27
2. Sulphur Vulcanization	
2.1 Vulcanization Agents	73
2.2 Sulphur Vulcanization Without Accelerators	80
2.3 Sulphur Vulcanization in the Presence of Organic Accelerators	98
2.4 Crosslinking of Polyoxipropylene (Propylene Oxide Rubber)	193
2.5 Breakdown of Crosslinks	195
3. Vulcanization without Free Sulphur	
3.1 Vulcanization with Thiuram Disulphides	207
3.2 Crosslinking with Peroxides	225
3.3 Crosslinking with Metallic Oxides	254
3.4 Crosslinking with Polyfunctional Amines	281
3.5 Crosslinking with Quinones	288
3.6 Crosslinking with p-Benzoquinone with p-Benzoquinone Dioxime	292
3.7 Crosslinking with Special Resins	300
3.8 Vulcanization with Chlorine-containing Compounds	309
3.9 Crosslinking with Azo Compounds	312
3.10 Crosslinking with Diisocyanates	316
3.11 Crosslinking of Silicone Rubber with Organo-metallic and Organo-silicone Other Crosslinking Compounds (Room Temperature Vulcanization) and Other Crosslinking Agents	326
3.12 Crosslinking by High Energy Radiation	329
4. Activators and Retarders	
4.1 Activators	355
4.2 Retarders	356
Index	359
