

## CONTENTS

**CHAPTER 1 RUBBER ELASTICITY: BASIC CONCEPTS AND BEHAVIOR**

I.	Introduction	1
II.	Elasticity of a Single Molecule	2
III.	Elasticity of a Three-Dimensional Network of Polymer Molecular	6
IV.	Comparison with Experiment	11
V.	Continuum Theory of Rubber Elasticity	12
VI.	Second-Order Stresses	16
VII.	Elastic Behavior under Small Deformations	19
VIII.	Some Unsolved Problems in Rubber Elasticity	19

**CHAPTER 2 POLYMERIZATION**

I.	Introduction	24
II.	Classification of Polymerization Reactions and Kinetic Considerations	25
III.	Functional Group Polymerization	27
IV.	Chain Addition Polymerization by Free Radical Mechanism	29
V.	Emulsion Polymerization	34
VI.	Copolymerization	43
VII.	Addition Polymerization by Cationic Mechanism	48
VIII.	Addition Polymerization by Anionic Mechanism	54
IX.	Stereospecific Polymerization and Copolymerization by Coordination Catalysts	61
X.	Graft and Block Copolymerization	65

**CHAPTER 3 STRUCTURE CHARACTERIZATION IN THE SCIENCE AND TECHNOLOGY OF ELASTOMERS**

	Introduction	75
I.	Chemical Composition and Repeat Unit Structure (Table I)	76
II.	Compositional and Sequence Distribution of Copolymers: Additives (Tables IIA, IIB)	79
III.	Molecular Weight and its Distribution (MWD): Branching: Gel (Tables III)	82
IV.	Rubber-Glass and Other Secondary Transitions (Table IV)	112
V.	Crystallinity (Table V)	116
VI.	Morphology (Table VI)	122

## **CHAPTER 4 THE MOLECULAR AND PHENOMENOLOGICAL BASIC OF RUBBERLIKE ELASTICITY**

I.	Introduction	155
II.	Statistics of a Polymer Chain	157
III.	Rubberlike Elasticity of a Polymer Network	172
IV.	Applications of Rubberlike Elasticity Theories	177

## **CHAPTER 5 DYNAMIC MECHANICAL PROPERTIES**

I.	Introduction	180
II.	Definitions of Dynamic Mechanical Properties and Viscoelastic Functions	181
III.	Zones of Dynamic Viscoelastic Behavior and Their Qualitative Molecular Interpretation	184
IV.	The Transition Zone	187
V.	The Plateau Zone	197
VI.	Practical Aspects of Dynamic Properties	201
VII.	Dynamic Properties in Large Deformations	209
VIII.	Experimental Methods and Apparatus for Measurements and Tests	215

## **CHAPTER 6 RHEOLOGICAL BEHAVIOR OF UNVULCANIZED RUBBER**

I.	Introduction and Historical Background	224
II.	Basic Concepts	226
III.	Rheological Measurements	245
IV.	Molecular Structure Rheological Properties of Uncompounded Elastomers	255
V.	Flow of Blends and Compounds	265
VI.	Rheological Applications to Processing	270

## **CHAPTER 7 VULCANIZATION**

I.	General Considerations	292
II.	Sulfur Vulcanization	295
III.	Accelerated Sulfur Vulcanization	297
IV.	Vulcanization by Phenolic Resins, Quinone Derivatives, or Maleimides	315
V.	Vulcanization by Metal Oxides	322
VI.	Vulcanization by Peroxides	325
VII.	Cross-Linking by Chain Extension Reactions	330
VIII.	Thermoplastic Elastomers	333

## **CHAPTER 8 REINFORCEMENT OF ELASTOMERS BY PARTICULATE FILLERS**

I.	Introduction	339
II.	Carbon Black	340
III.	Filler Morphology and Its Characterization	241
IV.	Physical and Chemical Interactions at the Filler Surface	344
V.	The State of the Filler in the Rubber Mix	348
VI.	The State of the Rubber in the Filled Composite	349
VII.	Properties of Unvulcanized Rubber-Filler Mixes	350
VIII.	Mechanical Behavior of Filled Rubber Vulcanizates at Small and Moderate Behavior	352
IX.	Large Deformation Behavior	355
X.	Failure Properties	359

## **CHAPTER 9 THE RUBBER COMPOUND AND ITS COMPOSITION**

I.	Introduction	367
II.	Selection of Ingredients	368
III.	Compounding Costs	406
IV.	Mixing	408
V.	Resistance to Aging	410
VI.	Summary	416

## **CHAPTER 10 STRENGTH OF ELASTOMERS**

I.	Introduction	419
II.	Initiation of Fracture	420
III.	Crack Propagation	433
IV.	Tensile Rupture	440
V.	Abrasive Wear	451

## **CHAPTER 11 THE CHEMICAL MODIFICATION OF POLYMERS**

I.	Introduction	455
II.	Esterification, Etherification, and Hydrolysis of Polymers	456
II.	The Hydrogenation of Polymers	459
IV.	Dehalogenation, Elimination, and Halogenation Reactions in Polymers	461
V.	Other Addition Reactions to Double Bonds	464
VI.	Oxidation Reactions of Polymers	467
VII.	Miscellaneous Chemical Reactions of Polymers	468
VIII.	Block and Graft Copolymerization	470

## **CHAPTER 12 ELASTOMER BLENDS**

I.	Introduction	489
II.	Elastomer/Elastomer Blends	492
III.	Elastomer/Plastic Blends	514
IV.	General Correlations and Conclusion	524

## **CHAPTER 13 THERMOPLASTIC ELASTOMERS**

I.	Introduction	531
II.	Morphology of Thermoplastic Elastomers	535
III.	Behavior in the Transition Temperature Range	544
IV.	Orientation	550
V.	Mechanical Properties	559
VI.	Application of Thermoplastic Elastomers	563

## **CHAPTER 14 TIRE MANUFACTURE AND ENGINEERING**

I.	Introduction	569
II.	Tire Engineering	573
III.	Tire Manufacture	599
