Preface to the Second Edition xiii
Preface to the First Edition xv

1 Rubber Elasticity: Basic Concepts and Behavior

A. N. Gent

I. Introduction 1
II. Elasticity of a Single Molecule 2
III. Elasticity of a Three-Dimensional Network of Polymer Molecules 5
IV. Comparison with Experiment 11
V. Continuum Theory of Rubber Elasticity 13
VI. Second-Order Stresses 15
VII. Elastic Behavior under Small Deformations 17
VIII. Some Unsolved Problems in Rubber Elasticity 20
Acknowledgments 21
References 21

2 Polymerization

Roderic P. Quirk and Maurice M. Morton

I. Introduction 23
II. Classification of Polymerization Reactions and Kinetic Considerations 24
III. Step-Growth Polymerization 28
IV. Chain-Growth Polymerization by Free Radical Mechanism 30
V. Emulsion Polymerization 36

- VI. Copolymerization 47
- VII. Chain-Growth Polymerization by Cationic Mechanism 52
- VIII. Chain-Growth Polymerization by Anionic Mechanism 60
- IX. Stereospecific Polymerization and Copolymerization by Coordination Catalysts 70
- X. Graft and Block Copolymerization 79
- References 86

3 Structure Characterization in the Science and Technology of Elastomers

G. Ver Strate and D. J. Lohse

- I. Introduction 95
- II. Chemical Composition and Repeat Unit Structure 98
- III. Compositional and Sequence Distribution of Copolymers 100
- IV. Molecular Weight and Its Distribution 105
- V. Rubber-Glass and Other Secondary Transitions 142
- VI. Crystallinity 146
- VII. Morphology 151
- VIII. Entanglements 157
- Acknowledgments 161
- General References 161
- Tables 163

4 The Molecular Basis of Rubberlike Elasticity

B. Erman and J. E. Mark

- I. Introduction 189
- II. Structure of a Typical Network 190
- III. Elementary Molecular Theories 191
- IV. More Advanced Molecular Theories 198
- V. Phenomenological Theories 200
- VI. The Stress-Strain-Swelling-Temperature Relations 201
- VII. Direct Determination of Molecular Dimensions 208
- References 209

5 Dynamic Mechanical Properties

Ole Kramer, Søren Hvidt, and John D. Ferry

- I. Introduction 211
- II. Definitions of Dynamic Mechanical Properties and Viscoelastic Functions 212
- III. Zones of Dynamic Viscoelastic Behavior and Their Qualitative Molecular Interpretation 215
- IV. The Transition Zone 219
- V. The Plateau Zone 229
- VI. Practical Aspects of Dynamic Properties 234
- VII. Dynamic Properties in Large Deformations 242
- VIII. Experimental Methods and Apparatus for Measurements and Tests 249
- IX. Appendix: Nomenclature 253
- References 254

6 Rheological Behavior and Processing of Unvulcanized Rubber

James L. White

- I. Introduction 257
- II. Basic Concepts of Mechanics 262
- III. Rheological Properties 265
- IV. Boundary Conditions 287
- V. Mechanochemical Behavior 293
- VI. Rheological Measurements 295
- VII. Processing Technology 303
- VIII. Engineering Analysis of Processing 317
- References 330

7 Vulcanization

A. Y. Coran

- I. Introduction 339
- II. Definition of Vulcanization 340
- III. Effects of Vulcanization on Vulcanizate Properties 341
- IV. Characterization of the Vulcanization Process 343
- V. Vulcanization by Sulfur without Accelerator 346

- VI. Accelerated-Sulfur Vulcanization 348
- VII. Vulcanization by Phenolic Curatives,
Benzoquinone Derivatives,
or Bismaleimides 366
- VIII. Vulcanization by the Action of Metal
Oxides 370
- IX. Vulcanization by the Action of Organic
Peroxides 372
- X. Dynamic Vulcanization 377
- References 383
- Bibliography 385

8 Reinforcement of Elastomers by Particulate Fillers

A. I. Medalia and Gerard Kraus

- I. Introduction 387
- II. Carbon Black 388
- III. Filler Morphology and Its
Characterization 389
- IV. Physical and Chemical Interactions at the Filler
Surface 394
- V. The State of the Filler in the Rubber Mix 398
- VI. The State of the Rubber in the Filled
Composite 399
- VII. Properties of Unvulcanized Rubber-Filler
Mixes 400
- VIII. Mechanical Behavior of Filled Rubber
Vulcanizates at Small and Moderate
Strains 402
- IX. Large Deformation Behavior 407
- X. Failure Properties 411
- References 416

9 The Science of Rubber Compounding

W. W. Barbin and M. B. Rodgers

- I. Introduction 419
- II. Polymers 420
- III. Filler Systems 432
- IV. Stabilizer Systems 442
- V. Vulcanization System 448

- VI. Special Compounding Ingredients 457
- VII. Compound Development 461
- VIII. Compound Preparation 465
- IX. Environmental Requirements
in Compounding 466
- X. Summary 468
- References 468

10 Strength of Elastomers

A. N. Gent

- I. Introduction 472
- II. Initiation of Fracture 472
- III. Threshold Strengths and Extensibilities 479
- IV. Fracture under Multiaxial Stresses 481
- V. Crack Propagation 486
- VI. Tensile Rupture 495
- VII. Repeated Stressing: Mechanical Fatigue 502
- VIII. Surface Cracking by Ozone 505
- IX. Abrasive Wear 506
- Acknowledgments 510
- References 510

11 The Chemical Modification of Polymers

A. F. Halasa, J. M. Massie, and R. J. Ceresa

- I. Introduction 513
- II. Esterification, Etherification, and Hydrolysis
of Polymers 515
- III. The Hydrogenation of Polymers 518
- IV. Dehalogenation, Elimination, and
Halogenation Reactions in Polymers 520
- V. Other Addition Reactions to Double
Bonds 523
- VI. Oxidation Reactions of Polymers 526
- VII. Functionalization of Polymers 526
- VIII. Miscellaneous Chemical Reactions
of Polymers 527
- IX. Block and Graft Copolymerization 527
- References 542
- Bibliography 543

Elastomer Blends

P. J. Corish

- I. Introduction 545
- II. Elastomer–Elastomer Blends 548
- III. Elastomer–Plastics Blends and Thermoplastic Rubbers 582
- IV. General Correlations and Conclusions 592
- References 592

Thermoplastic Elastomers

Brian P. Grady and Stuart L. Cooper

- I. Introduction 601
- II. Synthesis 606
- III. Morphology of Thermoplastic Elastomers 613
- IV. Properties and Effect of Structure 637
- V. Thermodynamics of Phase Separation 645
- VI. Thermoplastic Elastomers at Surfaces 655
- VII. Rheology and Processing 665
- VIII. Applications 668
- References 670

Tire Engineering

F. J. Kovac and M. B. Rodgers

- I. Introduction 675
- II. Tire Types and Performance 676
- III. Basic Tire Design 678
- IV. Tire Engineering 680
- V. Tire Materials 693
- VI. Tire Testing 707
- VII. Tire Manufacturing 712
- VIII. Summary 717
- References 718

Index 719
