PART 1	BASICS.....	1
1	Introduction	3
2	The Problems	5
3	The Choice of Approaches	7
4	Degradation Agents.....	9
5	Degradation Mechanisms	13
	5.1 Introduction	13
	5.2 Thermo-oxidative degradation	14
	5.3 Thermal decomposition	17
	5.4 Radiation degradation	17
	5.5 Ultraviolet light degradation	19
	5.6 Ozone degradation	20
6	Time Dependent Limitations	23
	6.1 Induction period	23
	6.2 Oxygen diffusion	23
	6.3 Fluid transport	26
7	Critical Factors.....	29
8	Parameters to Monitor Degradation	31
	8.1 General	31

Practical Guide to the Assessment of the Useful Life of Rubbers

8.2 Tensile stress-strain properties	33
8.3 Hardness	33
8.4 Stress relaxation	34
8.5 Set	36
8.5 Dynamic stress-strain properties	37
8.6 Volume change	38
8.7 Other properties	39
8.8 Functional tests	41
8.9 Chemical analysis	42
9 Preparation of Test Pieces	43
10 Uncertainty and Application of Statistics	45
PART 2 PRODUCT TESTS AND EXPERIENCE	49
11 Simulating Service	51
11.1 General	51
11.2 Natural environmental exposure	51
11.3 Simulated design life	54
12 Experience	57
13 Principles of Product Testing	59
13.1 Introduction	59
13.2 When to test products	59
13.3 Design of product tests	60
13.4 Examples of test rigs	62
13.5 Summary	66

PART 3 ACCELERATED TESTS	67
14 General	69
14.1 Purpose of accelerated tests	69
14.2 Methods of acceleration	70
15 Fundamental Problems	73
16 Designing an Accelerated Test Programme	75
17 Effect of Temperature	77
17.1 Low temperature	77
17.2 Properties at service temperature	77
17.3 Thermal expansion	77
17.4 Heat ageing	78
18 Effect of Liquids	81
18.1 General procedures	81
18.2 Standard liquids	83
18.3 Water	84
19 Effect of Gases	85
19.1 General	85
19.2 Exposure to ozone	85
19.3 Evaluation of cracking	87
20 Weathering	91
21 Fatigue	95
21.1 General	95

Practical Guide to the Assessment of the Useful Life of Rubbers

21.2 Heat build-up tests	95
21.3 Flex cracking and cut growth tests	97
21.4 Tests in tension	98
22.5 Non-standard methods	99
22 Abrasion	101
22.1 General	101
22.2 Types of abrasion test	102
22.3 Abrasion test conditions	104
22.4 Abrasion test apparatus	105
22.5 Expression of abrasion test results	107
23 Other Degradation Agents	109
23.1 Biological attack	109
23.2 Ionising radiation	109
23.3 Electrical stress	110
24 Service Conditions	113
24.1 General	113
24.2 Temperature	113
24.3 Solar irradiation	114
24.4 Other factors	115
25 Prediction Techniques	117
25.1 General	117
25.2 Standardised procedures	118
25.3 Models for change of parameter with time	118
25.4 Environmental degradation tests	120

25.5 Arrhenius relationship	121
25.6 Time/temperature shift	124
25.7 Artificial weathering	128
25.8 Ionising radiation	130
25.9 Effect of liquids	132
25.10 Effect of gases	133
25.11 Creep and stress relaxation	133
25.12 Set	135
25.13 Fatigue	135
25.14 Abrasion	137
25.15 Dynamic conditions	137
26 Limitations and Pitfalls in Accelerated Testing	139
26.1 Limitations	139
26.2 Pitfalls	140
Appendix	143
References	149
Abbreviations	151
Index	153
