Introduction	1
1 Substrate Preparation Methods	3
1.1 Metal Preparation - General Techniques	3
1.1.1 Structure of Metal Substrates - Metallography	3
1.1.2 Bonding	5
1.1.3 Rubber Component with Metal Support	5
1.1.4 Metal Pre-treatments	6
1.2 Pre-treatments of Plastics and Rubbers	12
1.2.1 Introduction	12
1.2.2 Studies of Pre-treatments for Plastics	13
1.2.3 Hydrocarbon Rubbers with Little or No Unsaturation	19
1.2.4 Unsaturated Hydrocarbon Rubbers	20
1.2.5 Halogenated Rubbers	25
1.2.6 Miscellaneous Rubbers	26
1.2.7 Discussion	27
1.2.8 Summary	29
1.3 Bonding Rubbers to Plastic Substrates	29
1.3.1 Introduction	29
1.3.2 Plastics Substrate Preparation	31
1.3.3 Degreasing and Solvent Cleaning	35
1.3.4 Adhesive/Bonding Agent Choice	36
1.4 Substrate Preparation for Bonding Using the Wet Blast Process	42
1.4.1 Summary	42
1.4.2 The Wet Blast Phosphating Plant	42

The Handbook of Rubber Bonding

1.4.3	Comparison Between Conventional and Wet Blast Phosphating ..	45
1.4.4	The Wet Blast Phosphating Plant	46
1.4.5	Advantages of the Wet Blast Phosphating Plant	47
2	Rubber to Metal Bonding	57
2.1	History	57
2.2	Bond System Characteristics	62
2.2.1	Adhesive Characteristics	62
2.2.2	Compound Characteristics	64
2.3	Adhesion	66
2.4	Effective Bond Formation	71
2.5	Post Vulcanisation Bonding	73
2.6	Factors Affecting Bond Integrity	73
2.7	Bond Failure Types	74
2.8	Bond Test Procedures	76
2.9	Summary	77
3	Rubber to Metal and Other Substrate Bonding	81
3.1	Introduction	81
3.1.1	Foreword	81
3.1.2	History	81
3.1.3	Types of Bonding	82
3.1.4	The Bonding Process - An Overview	83
3.1.5	Development of Bonding	84
3.1.6	Bonding Agent Reliability	84
3.1.7	The Environment and Solvent Use	86
3.1.8	Methods of Reduction in Solvent Emissions	87
3.2	Substrates and their Preparation	87
3.2.1	Mechanical Treatment of Metals	88

3.2.2	The Abrasion Process	90
3.2.3	Levels of metal cleanliness	92
3.2.4	Time Window	93
3.2.5	Chemical Preparation of Surfaces	94
3.2.6	Future Developments	96
3.3	Bonding Agent Preparation	97
3.3.1	Solvent-borne Bonding Systems	97
3.4	Bonding Agent Application and Use	98
3.4.1	Application Methods	98
3.4.2	Waterborne Bonding Systems	98
3.4.3	Bonding Agent Thickness	99
3.5	Post Vulcanisation Bonding	100
3.5.1	Post Vulcanisation Bonding Applications	100
3.5.2	Choice of Bonding Agent for Post Vulcanisation Bonding	100
3.5.3	Rubber Substrate Preparation for PV Bonding	101
3.5.4	Metal Substrate Preparation	101
3.5.5	Methods of Application	101
3.6	Waterborne Bonding Systems	103
3.6.1	History	103
3.6.2	Differences Between Solvent and Waterborne Bonding Agents ..	103
3.6.3	Suggested Spraying Equipment and Conditions	105
3.6.4	Application and Substrate Temperatures	105
3.6.5	Film Thickness	106
3.6.6	Layover	106
3.6.7	Progress in Performance	106
3.7	Health and Safety in the Workplace	109
3.7.1	The Safety Data Sheet	109
3.7.2	Perspective	110
3.8	Bonding Agent Testing	110

The Handbook of Rubber Bonding

3.9	Shelf Life Considerations	112
3.9.1	Shelf Life Categories	113
3.9.2	Procedures for Re-certification of Bonding Agents	113
3.10	Troubleshooting	115
3.11	Summary	120
4	Bonding Rubber to Metals with Waterborne Adhesive Systems	125
4.1	Introduction	125
4.1.1	Solvent Elimination by the Rubber Industry	126
4.1.2	Techniques Necessary in Bonding of Rubber to Meet Local Environmental Pollution Limits	127
4.2	Waterborne Bonding Systems	127
4.2.1	Structure of Organic Solvent-based Bonding Systems	127
4.2.2	Structure of Waterborne Bonding Systems	127
4.2.3	Fundamentals of Waterborne Bonding Agent Application	128
4.2.4	Waterborne Bonding Systems in Factory Usage	128
4.2.5	Metal Preparation - For Waterborne Bonding Systems	129
4.2.6	Waterborne Bonding Agent Application	129
4.2.7	Waterborne Bonding Agent Storage Stability	130
4.2.8	Non Bond Advantages of Waterborne Bonding Systems	130
4.2.9	General Comments - Waterborne Bonding Agents	130
4.3	Waterborne Bonding Agents - A Factory Experience	131
4.3.1	Thickness Effects	131
4.3.2	Pre-bake Resistance	133
4.3.3	Primers	134
4.3.4	Polymer Range	134
4.3.5	Product Range	134
4.3.6	Current Disadvantages of Waterborne Bonding Agents	134
5	Rubber to Rubber Bonding	137
5.1	Bonding of Unvulcanised Rubbers	137

5.1.1	Tack/Autohesion	137
5.1.2	Influence of Vulcanisation System	139
5.1.3	Influence of Filler Type	140
5.1.4	Effects of Plasticisers/Process Oils	141
5.1.5	Effects of Tackifiers	141
5.1.6	Effects of Other Ingredients	142
5.1.7	Effects of Surface Modification	142
5.1.8	Effects of Surface Roughness	144
5.1.9	Influence of Contact Time/Pressure/Temperature	144
5.1.10	Effects of Blooming	145
5.1.11	Effects of Ageing	146
5.1.12	Testing of Tack/Autohesion Levels	147
5.1.13	Adhesion Theories	148
5.2	Bonding of Vulcanised Rubbers to Unvulcanised Rubbers	150
5.3	Bonding of Vulcanised Rubbers	152
5.3.1	Strip Bonding of Tyre Retreading Components	152
5.3.2	Effects of Strip Thickness	155
5.3.3	Effects of Surface Roughness	156
5.3.4	Effects of Temperature on Bonding	156
5.3.5	Effects of the Chemical Nature of Polymers/ Polymeric Additives/Surface Roughness	156
5.3.6	Urethane Adhesive Systems	158
5.3.7	Surface Treatments to Improve Bonding	158
5.3.8	Effects of Contact Time/Surface Bloom	159
5.4.	The Mechanism of Adhesion of Fully Cured Rubbers	159
6	Rubber-Brass Bonding	163
6.1	Introduction	163
6.2	Mechanism of Rubber-Brass Bonding	165
6.2.1	Reviews	165
6.2.2	Recent Mechanistic Studies	165

The Handbook of Rubber Bonding

6.2.3	Updated Rubber-Brass Adhesion Model	170
6.2.4	New Evidence for Ageing of the Interfacial Sulphide Film	177
6.2.5	Compounding for Brass Adhesion	180
6.2.6	Additives to Compounds for Brass Adhesion	181
6.2.7	Developments in Metal Pre-treatments	184
6.2.8	Developments of Novel Alloys for Bonding to Rubber	189
6.2.9	Miscellaneous	190
6.2.10	Summary	190
7	Review of Tyre Cord Adhesion	197
7.1	Introduction	197
7.2	Accepted Mechanisms of Rubber-Brass Bonding	198
7.3	Ageing of the Rubber-Brass Bond	200
7.4	Metal Organic Cobalt Salts.....	201
7.5	The Role of Resins and Silica/Resin Systems	205
7.6	Summary.....	208
8	Rubber to Metal Bonding Using Metallic Coagents	213
8.1	Introduction	214
8.2	Metallic Coagents	215
8.2.1	Scorch Safety	217
8.2.2	Tensile Properties	219
8.2.3	Tear Strength	220
8.3	Experimental	221
8.3.1	Materials	221
8.4	Results and Discussion.....	229
8.4.1	Adhesion to Metals.....	229
8.4.2	Adhesion to Fibres and Fabrics.....	235
8.5	Summary.....	238

9	Rubber to Fabric Bonding	241
9.1	Introduction	241
9.2	Adhesive Systems	241
9.2.1	Aqueous Fabric Treatments	241
9.2.2	Solvent-Based Adhesive Systems	248
9.2.3	<i>In Situ</i> Bonding Systems	249
9.3	Mechanisms of Adhesion	250
9.3.1	Dip/rubber Interface	250
9.3.2	Dip/textile Interface	252
9.4	Other Factors Affecting Adhesion	253
9.4.1	Storage of Treated Textiles	253
9.4.2	Adhesion in Service	254
9.5	Environmental Aspects	254
9.5.1	Storage and Handling	254
9.5.2	In Process	255
9.5.3	Wastes and Disposal	255
10	Bonding Rubber with Cyanoacrylates	259
10.1	Introduction	259
10.2	Liquid Cyanoacrylates	259
10.3	Curing of Cyanoacrylates	260
10.3.1	Factors Affecting Cure	261
10.3.2	Cure Speed	263
10.4	Types of Cyanoacrylate	263
10.4.1	Bonding to Acidic and Porous Substrates	264
10.4.2	Toughened Cyanoacrylates	265
10.4.3	Flexible Cyanoacrylates	266
10.4.4	UV Curing Systems	266
10.5	Design Considerations	266

The Handbook of Rubber Bonding

10.5.1	Minimise Peel and Deavage Loads	267
10.5.2	Bond Line Thickness	268
10.5.3	Special Requirements for Bonding with Cyanoacrylates....	269
10.5.4	Internal and External Mould Release Agents	269
10.5.5	Successful Joint Design	269
10.6	Bonding to Silicone Rubber.....	270
10.7	Environmental Resistance	270
10.7.1	Glass Bonding	272
10.7.2	Hot Strength	272
10.8	Activators.....	274
10.9	Application Methods for Cyanoacrylates	275
10.9.1	Pressure/Time Systems	275
10.9.2	Syringe Systems	276
10.10	Health and Safety and Handling Precautions	276
10.11	Typical Applications.....	277
10.11.1	Bonding Nitrile, Polychloroprene and Natural Rubbers....	277
10.11.2	Bonding EPDM	277
10.11.3	Bonding Santoprene and Silicone Rubbers	279
10.11.4	Bonding Medical Devices	279
10.12	Troubleshooting	280
10.12.1	Blooming of Cyanoacrylates	280
11	Bonding Silicone Rubber to Various Substrate	285
11.1	Introduction	285
11.2	Why Bond Silicone Rubber?.....	286
11.3	Material Combinations of Interest - Examples	287
11.3.1	Silicone to Silicone Bonding (Soft and Soft)	287
11.3.2	Silicone to Plastic Bonding (Soft and Hard)	288
11.3.3	Silicone to Metal Bonding (Soft and Hard)	288
11.3.4	Why Use Silicone Rubber for Such Composites?	288

11.4	Some Applications of Silicone Rubber Composites	290
11.5	Bonding Concepts	291
11.5.1	Undercuts	291
11.5.2	Primers	292
11.5.3	Self-adhesive Silicone Rubbers	292
11.5.4	The Build-up of Adhesion	292
11.6	Bonding of Liquid Rubber (LR)	293
11.6.1	Properties of Self-adhesive LR	297
11.6.2	Limitations of Self-adhesive LR	298
11.7	Bonding of Solid Rubber (HTV)	299
11.7.1	Self-adhesive HTV Silicone Rubber Applications	299
11.7.2	Applications for Self-adhesive HTV	301
11.7.3	HTV Used in Other Bonding Applications	303
11.8	Processing Techniques	303
11.8.1	Liquid Rubbers in Inserted Parts Technology	303
11.8.2	LR in Two-component Injection Moulding Technology (Two Colour Mould)	306
11.9	Silicone to Silicone Bonding (Soft and Soft)	308
11.10	Cable Industry	309
11.11	Duration of Bonding Properties	309
11.11.1	Duration of Bonding - Chemically Bonded Composites	311
11.12	Alternatives to Injection Moulding	313
11.12.1	Adhesives	313
11.12.2	Welding	313
11.12.3	Mechanical Bonding Techniques After Moulding	314
11.13	Summary	314
