

CONTENTS OF VOLUME II

	Page
Preface	v
Outline of IRC '85 Proceedings	vii
Conference Committees	x
Contents of Volume II	xiii
CHEMISTRY AND PHYSICS OF RUBBER I	
Modification of Rubber Properties by Crown Budding. W. <i>Leong</i> , <i>E. Yip</i> , A. <i>Subramaniam</i> , K.M. <i>Loke</i> and P.K. <i>Yoon</i>	3
✓ Influence of Crosslink Structure on Properties in Crystallising and Non- crystallising Polyisoprenes. P. S. <i>Brown</i> , M. <i>Porter</i> and A. G. <i>Thomas</i>	20
Catalytic Hydrogenation of Natural Rubber. D.R. <i>Burfield</i> , K.L. <i>Lim</i> , P.K. <i>Seow</i> and C.T. <i>Loo</i>	47
Effect of the Non-rubber Ingredients in Natural Rubber on Ageing Properties. M. <i>Morimoto</i>	61
Structural Characterisation of Cis-Polyisoprenes from Sunflower, <i>Hevea</i> and Guayule. Yasuyuki <i>Tanaka</i>	73
Comparative Resilience and Differential Scanning Calorimetric Studies of Natural Rubber Vulcanisates. Asiah <i>Abdullah</i> and David R. <i>Burfield</i> and E. L. <i>Ong</i>	83
CHEMISTRY AND PHYSICS OF RUBBER II	
A Novel Design of Rubber Spring. A. G. <i>Thomas</i>	97
✓ Physico-chemical Aspects of Rubber Adhesion. A. D. <i>Roberts</i>	111
Tensile Failure of Natural Rubber. A. <i>Kadir</i>	126
✓ Crystallisation Studies of Natural Rubber and its Synthetic Analogues by Differential Scanning Calorimetry. David R. <i>Burfield</i> and Yasuyuki <i>Tanaka</i>	140
TECHNOLOGY OF DRY RUBBER	
✓ Carbonyl Reactive Antioxidant for Natural Rubber. W. S. E. <i>Fernando</i> , E. D. I. H. <i>Perera</i> and K. A. R. M. <i>Perera</i>	153

	Page
Press-cure Time Reduction by Irradiation of Compounded Natural Rubber. <i>Sumarno Kartowardoyo and Suryana</i>	163
Survey of Carbon Blacks in Vibration Isolation. <i>Gino Pancioli</i>	173

EFFLUENT TREATMENT

Biological Oxidation of Rubber Effluent Using the Rotating Biodisc. <i>Mohd. Zin Abd. Karim and Ahmad Ibrahim</i>	193
Aeration Systems for the Treatment of Effluent from Latex Concentrate Factories. <i>Ahmad Ibrahim and C. K. John</i>	202
Characterisation and Treatment of Air Pollutants from Remilling SMR Factories. <i>Yong Wai Ming, Yap Fook, M. Mohinder Singh, C. K. John, Lee Seng Chai and Tan Liam Seng</i>	209

TEST METHODS

A Test for Assessing the Breakdown and Mixing Behaviour of Viscosity Stabilised Grades of Natural Rubber. <i>Lim Hun Soo and Lim Chong Lian</i>	225
A New Equipment for Measuring Creep and Recovery of Raw Rubber and Crude Compounds. <i>R. Chasset and H. de Livonniere</i>	244
A Method for the Routine Determination of Compression Modulus of Rubber Vulcanisates. <i>O. H. Yeoh</i>	256
Measurement of Dry Rubber Content of Natural Rubber Latex and Wet Crepe Using Specific Heat. <i>E. M. Harris, Nor Aishah A. Aziz and Morni Amiruddin</i>	271

EPOXIDISED NATURAL RUBBER

Some Aspects of Processing and Ageing of Epoxidised Natural Rubber. <i>Abu bin Amu, Ku Abdul Rahman bin Ku Ismail and Sidek bin Dulngali</i>	289
Epoxidised Natural Rubber in Tubeless Tyre Inner Liners. <i>Loh Pang Chai and See Toh Mook Sang</i>	312
Epoxidised Natural Rubber in Passenger Car Tyre Treads. <i>C. S. L. Baker, I. R. Gelling and J. Palmer</i>	336

	Page
A New Approach to Tyre Compounding with Particular Reference to Motorcycle Tyres. <i>See Toh Mook Sang, Loh Pang Chai and R. Newell</i>	353
Vulcanisation of Epoxidised Natural Rubber with Dibasic Acids. <i>Loo Cheng Teik</i>	368
Tearing Characteristics of Epoxidised Natural Rubber. <i>Azemi bin Samsuri, A. G. Thomas, I. R. Gelling and E. Southern</i>	386

DEVELOPMENTS IN PROCESSING

• Viscosity Control of Natural Rubber in the Solid State. <i>M. Nadarajah, K. P. N. De Silva, G. A. De Silva and R. P. Dharmasena</i>	405
Improvement of Natural Rubber Processing and Drying Conditions by Getting a More Controlled Structure of Latex Coagulum. <i>H. Roudeix</i>	423
A Simple and Low-cost Process of Drying Natural Rubber in Lace Form. <i>Ranjan Wijeratne, M. R. C. Peiris, N. Dias Abesinghe, W. A. Fonseka, R.L. Wijeyaratne and Ananda Witharana</i>	434
A Production Test for Continuous Drying and Baling of Standard Rubber. <i>Wei Yushan, Hwang Jiahan, Yang Lingzhan, Liu Peiming, Li Mongquan, Liang Zanzing, Lu Henxiang, Tian Guoren and Men Qingai</i>	440

LATEX CHEMISTRY AND TECHNOLOGY

• Further Development in <i>Hevea</i> Latex Preservation. <i>C.K. John, N.P. Wong, H. C. Chin, P. S. Rama Rao and Abdul Latiff</i>	451
• Processability of LA-TZ Latexes in Relation to Their Properties. <i>A. D. T. Gorton and T. D. Pendle</i>	468
• Room Temperature Pre-vulcanisation of Natural Rubber Latex. <i>N. P. Wong and C. T. Loo</i>	487
Radiation Vulcanisation of Natural Rubber Latex with Acrylic Monomers. <i>K. Makuuchi and T. Tsushima</i>	502
• Some Recent Electron Microscopic Studies of <i>Hevea</i> Latex Particles. <i>J. B. Gomez and A. Subramaniam</i>	510

	Page
✓ An Electron Microscopic Study of the Epoxidation of Natural Rubber Latex Particles. <i>C. M. Lau, J. B. Gomez and A. Subramaniam</i>	525

PROCESSABILITY

✓ Breakdown Behaviour of Natural Rubber and Its Influence on Processability. <i>C. L. Lim and E. L. Ong</i>	557
✓ Natural Rubber Processability. <i>John M. Long</i>	571
Lumped Parameter Model for Milling Rubber. <i>A. M. Brichta</i>	592
Extrudate Swell Behaviour of Natural Rubber, Styrene-butadiene Rubber and Blends of Natural Rubber with Synthetic Polyisoprene. <i>C. M. Kok, R. Omar, C. S. Ong and J. W. Teh</i>	610
Effect of Process Aids on the Processing Behaviour of Natural Rubber. <i>E. L. Ong and C. L. Lim</i>	622

END-USES OF NATURAL RUBBER

Thermoplastic Natural Rubber Blends. <i>D. J. Elliott and A. J. Tinker</i>	633
Rubber in Offshore Engineering. <i>A. Stevenson</i>	645
Natural Rubber Rail Pads. <i>A. Kadir</i>	677
Recent Developments in Seismic Base Isolation. <i>C. J. Derham and A. G. Thomas</i>	690
New Formulations and Recommendations in the Use of Natural Rubber for Soil Stabilisation and Erosion Control. <i>A.T. Bachik, C.S. Yeoh, Y. K. Chee, F. K Yew and G. Haridas</i>	701
Commercial Application in the Use of Natural Rubber Latex Emulsions for Hydroseeding. <i>Ho Chiu Wah and A. T. Bachik</i>	710
