

CONTENTS

1	Introduction	1
2	Standards and Standards Organisations	4
2.1	Standards – test methods and specification	4
2.2	Organisations producing standards	7
2.3	Units	16
3	Limitations of Test Results – Statistics	27
3.1	Variability	28
3.2	Test methods value	30
3.3	Sampling and quality control	34
3.4	Treatment of results	36
3.5	Design of experiments	46
4	Preparation of Test Pieces	51
4.1	Mixing and moulding	51
4.2	Cutting from sheet	54
4.3	test pieces from finishes products	56
5	Conditioning and Test Atmospheres	59
5.1	Storage	59
5.2	Conditioning	61
5.3	Testing conditions	62
5.4	Apparatus for conditioning	63
5.5	Mechanical conditioning	66
6	Tests on Unvulcanised Rubbers	79
6.1	Standard methods for particular polymers	79
6.2	Sample preparation	80
6.3	Viscoelastic flow behaviour	80
6.4	Scorch and cure rate	93
6.5	Tack	96
6.6	Other tests	97

7	Density and Dimensions	101
7.1	Density	101
7.2	Dimensions	105
8	Short Term Stress and Strain Properties	112
8.1	Hardness	114
8.2	Tensile stress/strain	125
8.3	Compression stress/strain	140
8.4	Shear stress/strain	143
8.5	Flexible (bending) stress/strain	146
8.6	Tear tests	148
9	Dynamic Stress and Strain Properties	158
9.1	Rebound resilience	164
9.2	Free vibration methods	171
9.3	Forced vibration methods	176
10	Friction and Wear	184
10.1	Friction	184
10.2	Wear	189
11	Creep, Relaxation and Set	200
11.1	Creep	201
11.2	Stress relaxation	203
11.3	Set	208
12	Fatigue	214
12.1	Flex-cracking and cut-growth tests	215
12.2	Heat build-up	220
13	Electrical Tests	224
13.1	Resistance and resistivity	225
13.2	Surface charge	232
13.3	Electric strength	233
13.4	Tracking resistance	235
13.5	Permittivity and power factor	236

14	Thermal Properties	239
14.1	Specific heat	239
14.2	Thermal conductivity	241
14.3	Thermal diffusivity	243
14.4	Surface heat transfer coefficient	243
15	Effect of Temperature	246
15.1	Thermal expansion	246
15.2	Transition temperature	247
15.3	Low temperature tests	249
15.4	Heat ageing	259
16	Environmental Resistance	268
16.1	Moist heat and steam tests	268
16.2	Effect of liquids	269
16.3	Effect of gases	277
16.4	Weathering	287
16.5	Biological attack	289
16.6	Fire	290
16.7	Radiation	291
17	Permeability	294
17.1	Gas permeability	295
17.2	Vapour permeability	300
18	Adhesion, Corrosion and Staining	305
18.1	Adhesion to metals	305
18.2	Adhesion to fabrics	310
18.3	Adhesion to cord	315
18.4	Corrosion of and adhesion to metals	316
18.5	Staining	317
	Index	323
