

## CONTENTS

<b>I. MECHANISM OF WEAR OF RUBBERS AND RUBBER PRODUCTS</b>	<b>1</b>
FATIGUE MECHANISM OF THE WEAR OF TYRE TREADS	3
FEATURES OF THE MECHANISM OF ABRASION OF HIGHLY ELASTIC MATERIALS	14
COMPARISON OF THE ABRASION OF RUBBERS AND PLASTICS	23
ABRASION OF RUBBER BY A SMOOTH INDENTOR	36
THE MECHANISM OF WEAR OF TREAD RUBBERS	45
FEATURES OF THE ABRASION OF RUBBER ON A METAL GAUZE	64
INVESTIGATION OF PHYSICO-CHEMICAL CHANGES IN THE STRUCTURE OF VULCANIZATES DURING THE PROCESS OF WEAR	74
INVESTIGATION OF THE ROLE OF CERTAIN NON-MECHANICAL FACTORS IN THE ABRASION OF RUBBERS	81
THE INFLUENCE OF RUBBER-CARBON BLACK STRUCTURES ON THE ABRASION RESISTANCE OF SKD cis-BUTADIENE VULCANIZATES	91
FAILURE OF RUBBERIZED MATERIALS DURING ABRASION	113
RELATION BETWEEN THE ABRASION RESISTANCE AND OTHER MECHANICAL PROPERTIES OF RUBBER	119
FRICITION-CONTACT FATIGUE OF HIGHLY-ELASTIC MATERIALS	127
FATIGUE MECHANISM OF WEAR UNDER RESILIENT CONTACT	135
CONNECTION BETWEEN WEAR-RESISTANCE OF PLASTICS AND OTHER MECHANICAL PROPERTIES	145
ABRASION OF POLYMERS AS A KINETIC THERMO-ACTIVATION PROCESS	155
CONNECTION BETWEEN ABRASION AND THE THERMOCHEMICAL STABILITY OF POLYMERS	168
<b>II. INFLUENCE OF COMPOUNDING AND PROCESSING FACTORS ON THE ABRASION RESISTANCE OF VULCANIZATES</b>	<b>175</b>
DEPENDENCE OF THE ABRASION RESISTANCE OF TREAD RUBBERS ON THE TYPE OF POLYMER	177
THE ROLE OF CARBON BLACK IN ENHANCING THE ABRASION RESISTANCE OF TREAD RUBBERS	197
ABRASION RESISTANCE OF VULCANIZATES BASED ON SOME NEW RESIN/RUBBER COMPOSITION	203
RUBBERS WITH ENHANCED ABRASION RESISTANCE	206
INCREASING THE HEAT-STABILITY AND ABRASION-RESISTANCE OF ASBESTOS FRICTION MATERIALS	209

TREAD MIXES MADE WITH HIGH-STYRENE RESINS	212
USE OF SKD cis-1,4-BUTADIENE RUBBER IN TYPE TREADS	216
COMBINED HEAT AND RADIOCHEMICAL VULCANIZATION OF TYRES	221
EFFECT OF CONTENT OF CARBON BLACK AND SOFTENER ON THE PROPERTIES OF TREAD VULCANIZATES OF STEREOREGULAR BUTADIENE RUBBERS	230
<b>III. METHODS OF ASSESSING THE ABRASION RESISTANCE OF RUBBER AND RUBBER PRODUCTS</b>	<b>245</b>
A NEW APPARATUS FOR THE ABRASION TESTING OF RUBBERS UNDER ROLLING CONDITIONS	247
INVESTIGATION OF THE ABRASION OF RUBBERS AT HIGH RATES OF REVOLUTION	254
LABORATORY TESTING OF MOTOR CAR TYRES FOR ABRASION RESISTANCE OF THE TREAD	261
A NEW METHOD OF MEASURING THE WEAR OF TYPE TREADS USING RADIOACTIVE SUBSTANCES	269
DETERMINATION OF THE WEAR OF RUBBERS IN A STREAM OF ABRASIVE PARTICLES	274
THE MEASUREMENT OF ABRASION RESISTANCE ON THE CHARACTER AND INTENSITY OF WEAR OF FABRICS	281
EFFECT OF THE TYPE OF ROAD SURFACE ON THE CHARACTER AND INTENSITY OF WEAR OF TYRES	285
A NEW METHOD AND APPARATUS FOR STUDYING THE ABRASION RESISTANCE OF RUBBERIZED FABRICS	290
THE MITR-2 MACHINE FOR DETERMINING THE FRICTIONAL PROPERTIES OF RUBBER-LIKE MATERIALS	294
MECHANICAL TESTING OF PLASTICS – WEAR	297
INVESTIGATION OF FRICTION AND WEAR IN CERTAIN POLYMERS	313
STUDY OF THE ABRASION RESISTANCE OF PLASTICS, CAST BASALT AND RUBBERS IN HYDRAULIC MIXTURES	317
ACCURACY OF MEASUREMENT OF WEAR OF TYRE TREADS	322
ABRASION RESISTANCE UNDER OPERATING CONDITIONS OF TREAD VULCANIZATES BASED ON STEREOREGULAR BUTADIENE RUBBERS	328

<b>IV. INFLUENCE OF DESIGN FACTORS ON THE ABRASION RESISTANCE OF RUBBER PRODUCTS</b>	<b>343</b>
THE INTERACTION OF A MOTOR VEHICLE TYRE TREAD WITH THE ROAD SURFACE	347
DETERMINATION OF THE WEAR OF PRODUCTS IN SERVICE USING A TOPOGRAPHICAL METHOD	359
EFFECTS OF CERTAIN PARAMETRES OF TREAD DESIGN ON THE LIFE OF TYRES	363
MAIN DESIGN PARAMETERS OF TYRES FOR MOTOR VEHICLES	371
NEW DESIGNS OF TYRES	380
