

CONTENTS

- a. Overview of Permeation, Solubility and Diffusion in Elastomers
- b. Water Absorption Phenomena in Elastomers
- c. Lewis Acid-Base Aspects of Liquid-Liquid Miscibility
- d. The Practical Aspects of Curative Diffusion in Elastomers
- e. FTIR Studies on Solubilities of Polymer Blends
- f. Permeability of Polymeric Membrane Liners
- g. Fluorescence Measurements of Diffusion in Polymer Systems
- h. Measuring the Transport of Water thru Elastomers by Using Tritium Tracers
- i. Permeation of Automotive Fuels: Laboratory Test Methods
