by T. G. Raftery, Manager – Suppliers' Quality Assurance, Assembly Division, Ford Motor Co. Ltd.	63
5 DISCUSSION PANEL	
N. L. J. Mould, M.C., B.A.Sc. (Chairman), J. H. Allen, B. J. A. Martin, T. G. Raftery, M. A. Simmons.	
<i>Evaluating 'sterling loss' on defects – Does price determine quality ? – Pressures of quality : 1. Piecework v. quality bonus, 2. Need for Supervision, 3. British standards compared with other countries, 4. The Attitude of Management – Standardisation of colour – Is the customer always right ? – Should we blame the worker ? – Can the small supplier maintain Acceptance standards ? – How to establish Q.C. standards for a new process – Control of mixed batches – Scientific aids to checking thickness – Should Quality Control supersede Production Control ? – What size should a Quality Control Department be ? – Ensuring that a random sample is really a random sample – Determining lot size for sampling – Balance of tyre and wheel assemblies – Quality Control of in-going products – Vendor vetting.</i>	83
