

Contents

<i>Preface</i>		v
<i>Acknowledgements</i>		vii
Chapter 1.	INTRODUCTION The Nature of the Materials. The Analytical Problem. Scope of the Book. General Principles: Polymers, Solid Fillers, Insoluble Adventitious Materials, Extractable Materials	1
Chapter 2.	SAMPLING AND SAMPLE PREPARATION Analysis of Average Composition: Thin Calendered Sheets or Proofings, Small Moulded Articles, Large Manufactured Articles, Rubberized Fabrics. Homogenization of Sample. Analysis of Localized Composition: Vulcanization State of Thick Articles, Analysis of Blooms, Bond Failure Problems, Inhomogeneity and Poor Dispersion. Size of Test Portion. Sample Preparation	15
Chapter 3.	EXTRACTIONS Preliminary Remarks. Nature of the Extraction Process. Standard Apparatus for Determination of Extract. Choice of Solvent. Time of Extraction. Rapid Extraction. Microscale Extraction Procedure. Thermal Extraction. Multiple Extractions. Latex. Specific Extractions	20
Chapter 4.	ANALYSIS OF EXTRACTS Identifications with No Separation: Plasticizers, Factice,	39

Tests for Some Specific Additives, Ultraviolet Spectroscopy, Analysis for Antioxidants, Analysis for Accelerators, Analysis for other Additives. Identifications after Separation: Thin Layer Chromatography, Infrared Spectroscopy, Gas Chromatography, Nuclear Magnetic Resonance, High Performance Liquid Chromatography, Ion Chromatography

- Chapter 5. **CHEMICAL ANALYSIS FOR POLYMER TYPE** . . . 66
 Preliminary Examination. Qualitative Examination for Elements Present: Lassaigne's Test, Beilstein Test for Halides (Excluding Fluoride), Soda-lime Test for Nitrogen. Differentiation of Polymers After Element Tests: Halogens, Sulphur and Nitrogen Absent, Nitrogen Present in Traces Only, Nitrogen Present, Chlorine Present, Chlorine and Sulphur Present, Sulphur Present, Fluorine Present. Acid Resistance. Specific or Near Specific Tests: Azo Dye Reaction for Styrene, Styrene Content of Copolymers, Weber Reaction for Polyisoprene, Polyisoprene Content by Methyl Group Determination (Kuhn-Roth Method), Detection of Isobutene by Mercuration, Unsaturation. Miscellaneous Identification Problems: Chloropolymers, Polyurethanes, Natural Rubber
- Chapter 6. **QUANTITATIVE ELEMENTAL ANALYSIS** . . . 90
 Carbon and Hydrogen (with Nitrogen), Nitrogen, Oxygen, Chlorine and Bromine: Conversion of Organic Chlorine to Chloride, Determination of Chloride and Bromide, Fluorine, Silicon, Phosphorus, Sulphur: Determination of Total Sulphur, Determination of Free (Elemental) Sulphur, Determination of Sulphide Sulphur, Ion Chromatography
- Chapter 7. **SOLUTION METHODS** . . . 123
 Theoretical Considerations: Theta Temperature, Guidelines to Solubility. Practical Considerations: Preparation of a Solution, Removal of Solvent, Selective Solution, Selective Precipitation
- Chapter 8. **INSTRUMENTAL POLYMER ANALYSIS** . . . 138
 Infrared Spectroscopy: Sample Preparation and Presentation, The Running of the Spectrum, Interpretation of

Spectral Data. Pyrolysis-Gas Chromatography. Derivative Thermogravimetry: Polymer Identification, Polymer Blend Quantification. Differential Scanning Calorimetry: Glass Transitions, Crystallization and Melting, High Temperature Events. Nuclear Magnetic Resonance. Scanning Electron Microscopy: Visual Aspects of Polymer Analysis, Elemental Analysis

- ✓ Chapter 9. POLYMER CHARACTERIZATION 173
 Molar Mass: End Group Analysis, Measurement of Colligative Property, Viscometry, Light Scattering, Gel Permeation Chromatography, Differential Scanning Calorimetry/Differential Thermal Analysis, Ultracentrifugation, Sedimentation Effects. Microstructure: Monomer Type, Monomer Distribution. Metathesis
- ✓ Chapter 10. INORGANIC FILLERS AND TRACE METAL ANALYSIS 202
 Ashing: Temperature of Ashing, Thermogravimetry, Acid Ashing, Wet Ashing. Bulk Filler Analysis. Trace Metals. Atomic Absorption Spectrophotometry. Total Sample Elemental Analysis: Destructive Elemental Analysis, Total Sample Atomic Absorption Spectrophotometry (Electrothermal atomization, ETA), Plasma Spectroscopy, Non-destructive Elemental Analysis, Electron Spectroscopy, Wavelength Dispersive X-ray Analysis, Energy Dispersive X-ray Analysis, Quantification of X-ray Analytical Data
- ✓ Chapter 11. CARBON BLACK 220
 Destruction and Filtration Methods. Removal of Polymer by Distillation. Type of Carbon Black. Analysis of Carbon Black Type: Total Surface Area, External Surface Area, Black Type by Thermogravimetry
- Chapter 12. FORMULATION DERIVATION AND CALCULATION 239
 Polymer Content: Copolymers, Latex Formulation Derivation: Extract, Polymer, Black, Ash, Sulphur, Formulation Calculation

Chapter 13	BLOOMS AND VISUALLY SIMILAR PHENOMENA	260
	True Blooms. Modified Blooms. Pseudo Blooms. Surface Contamination. Hazing (of Transparent Rubbers). Staining/Discoloration. Pre-analytical Check List: Colour Changes. Analytical Methods: Spot Tests, Multiple Internal Reflectance, Scanning Electron Microscopy. Removal of Bloom for Analysis	
Chapter 14.	VALIDITY OF RESULTS	271
	Introduction: Error, Accuracy and Precision. Meaningful Information from Imprecise Data: Arithmetic Mean, Standard Deviation, Significance Tests, Analysis of Variance, Outliers	
APPENDIX I	TABLE OF OFFICIAL NATIONAL AND INTERNATIONAL STANDARDS	295
APPENDIX II	ELASTOMERS: NOMENCLATURE, DESCRIPTION AND PROPERTIES	301
APPENDIX III	INTERCORRELATION OF ANALYTICAL TECHNIQUES	308
